Local Items

Mr. and Mrs. W. A. McLaughlin and little son Willis and Mrs. W. G. Bradford left on Tuesday morning for Hawkesbury, Ont., where they will spend the winter.

A number of Chinook folks attended the dance in Cereal on Monday night.

Mrs. H. Strong, of Big Spring, left on Monday for New York where she will spend the winter.

O Hinds shipped two car loads of cattle to Calgary on Tuesday.

Miss G. Bradford is spending a few days in Saskatoon this week.

Mr. and Mrs. R. Stewart moved into town on Monday for the winter months.

Ole Rudy left on Tuesday for Drumheller.

Sixteen cars of wheat have been shipped from Chinook to-date in comparison with 181 at the same date of 1923. About 41,000 bushels of wheat is in storage in the elevators.

The Ladies Aid are arranging to give a fowl supper and entertainment in the Church on Thursday evening, November 20.

Mrs. C. A. Gilders and little daughter Phyllis, of Oyen, were visitors over the week end at the home of Mr. and Mrs. R. Smith.

Gus Anderson, of Rearville, left on Tuesday for Vancouver where he will spend the winter.

Mrs. R. Rowe and her two children, of Hanna, are visiting at the home of Mr. and Mrs. S. H. Smith.

A meeting of the Chinook Curling Club will be held to-night (Thursday) in the Banner Hardware store. All interested in curling are invited to attend.

Mr. Robert Niven, who has been visiting friends in Hanna, returned to town on Wednesday.

The ladies card club met on Tuesday evening at the home of Mrs. Rennie. The prize was a lovely Madeira tray cloth and was won by Mrs. Hinds. The consolation prize going to Mrs. Lee. The club will meet at the home of Mrs. Deman next Tuesday evening.

Mr. David Stewart received a telegram last Saturday informing him of the serious illness of his father who resides in Victoria, and is in his ninetieth year. Mr. Stewart and his brother Edward left for the parental home on Sunday morning.

Mrs. Tracy was hostess of a most enjoyable bridge party last Thursday evening, when two tables were arranged for the games.

Rev. R. T. Harden, of Cereal, will conduct a service in the Chinook Church next Sunday evening at 7.30.

Messrs. J. Sibbald of Heathdale and R. Witt of Chinook, have purchased a De Forest Crosley Radiophone from the local dealers Messrs. Cooley Brothers.

Boy Scouts Concert

One of the most enjoyable entertainments of the season was given under the auspices of the Chinook Boy Scouts in the School last Monday evening.

The entertainment consisted of recitations, dialogues and songs by the Scouts, and musical and vocal selections by local talent, and every item on the entire programme held the interest of the audience from the beginning to the end.

One of the greatest forward movements in education is the attention given to the physical culture which the Boy Scout organization advocates, and the result of this work plainly shows the necessity of a healthy body to enable the mind to exercise its faculties to their fullest extent.

Mr. R. Jones sang two very pleasing numbers which were as usual well received.

The violin solos by Mrs. Collin Bray also won a generous response from the audience.

Mrs. A. E. Roberts very nicely played a pianoforte selection which was listened to with great interest.

Messrs H. Bradford, R. Jones and K. Smith sang a comic trio entitled, "Fishing on a Sunday". They also sang as an encore "The Story of a Tack."

The sketch put on by Mary and Annie Clipsham, Dorothy Neff, Urdine Brownell and Alfred Deman was worthy of comment. The actors put expression and action into their parts and made a real hit with the audience.

But the novelty of the evening was undoubtedly the local cartoonist, Mr. A. H. Clipsham, who took the audience by storm when he so cleverly sketched his comic cartoons. The pictures were good and showed real talent.

The proceeds of the evening amounted to \$24.45.

Fighting Freight Rates Case

J. O. D. Mothersill, barrister of Edmonton, and A. Chard, Freight Traffic Supervisor of the Provincial Government, are representing the government at the hearing at Vancouver in the appeal to the railway commission by the B. C. Government for a lowering of freight rates on grain to the Vancouver terminal from the prairies. The Alberta Government through its representatives is supporting this application.

Annual Seed Fair

Preparations are now going forward for the annual provincial seed fair which is to be held this year at Calgary, from January 20 to 23, and which is receiving the active support of the Calgary Board of Trade. The seed fair is held under the auspices of the Provincial Department of Agriculture and the Seed Growers' Association.

Remember the fowl supper and entertainment in the Chinook Union Church on Thursday evening, November 20.

finer tea and more of it

Our Natural Resources And The Cost Of Production

In the course of one of the series of addresses made by him during his tour of Western Canada, Premier Mackenzie King said: "The only way to solve problems is to reduce, if possible, the cost of production—the cost of living."

No one is likely to take exception to this statement except that many people will say that the qualifying words, "if possible," should be eliminated. Few things are impossible of achievement if men are determined in their efforts to reach any desired end. So far as bringing about a reduction in the costs of production in Canada, and therefore in the cost of living, there can be no question but that it is possible. As Rotarians say, it can be done.

But it is not going to be done if such a large percentage of Canadian manufacturers continue to pursue their present policy of importing enormous quantities of raw materials, or semi-manufactured articles, for use in their finished products, and which could be obtained from Canada's own great wealth of natural resources and the whole process of manufacture carried out in Canada instead of only a part of it.

Canada's adverse balance of trade with the United States is largely made up of importations by Canadian manufacturers of materials and supplies which could be obtained and produced within Canada. Too many Canadian manufacturers prefer to follow the "easy way" of importation instead of utilizing a portion of their own capital in the development for use of the natural resources of this Dominion. As a result both the cost of production and of living is too high.

And then these finished products of Canadian factories, containing a large percentage in many instances of United States materials, are protected by heavy Customs duties against competition by similar articles made wholly in the United States. At the same time, hundreds of these factories, Canadian so-called, because they are located on Canadian soil, are nothing but branch factories of United States concerns erected on this side of the line in order to escape payment of Customs duties and to secure the benefits of the Canadian Preferential Tariff in Empire markets. In other words, in the case of hundreds of factories Canadian citizens are paying abnormally high prices because of a Customs tariff maintained to protect these United States offshoots from their parent concerns across the line.

Costs of production and of living in Canada will begin to tumble when Canada begins to make full use of its own natural resources, but not until then. Canadians cannot expect lower costs so long as their own manufacturers go on importing raw materials and semi-manufactured articles—upon which, of course, profits are first levied as well as transportation and tariff charges—instead of developing and making use of our own natural resources. Even in the case of many of our natural products now being developed, they are shipped in a raw state to the United States and brought back in a semi-manufactured or completed state, instead of Canada's own capitalists and industrial leaders providing for their complete manufacture in this country.

United States' owners of branch factories in Canada are naturally quite content to bring in raw or semi-manufactured materials from the United States, and get the bulk of the duty rebated to them when such materials are used in producing a finished article in this country. But Canadian manufacturers should not be content, although most of them appear to be.

Inasmuch as the development and production for use of our own natural resources offers the only sure method of reducing production and living costs, and also presents the only means through which necessary wealth is to be produced to ultimately pay off Canada's great war debt and thus reduce the heavy taxation burden, which, by the way, is also a big factor in keeping up production and living costs, it would appear to be the duty of the Canadian Government and Parliament to immediately tackle the problem of effecting a rapid development of these Canadian resources.

Instead of allowing heavy rebates on United States and other foreign materials when used in manufactures in Canada, why not try the plan of largely reducing the Customs protection afforded all manufacturers where the article manufactured is not made wholly out of Canadian materials. This would have the effect of providing real protection for bona fide Canadian goods, prove a stimulus to employment, and compel United States branch factories in this country to use Canadian raw materials.

Most important of all it would assist to bring about the development of our own natural resources, which development, let it be emphasized, is essential to the economic independence and national progress and prosperity of this Dominion.

Prospective Land Buyers

Americans Purchasing Lands in Northern Agricultural Districts Accompanied by agents of the colonization department of the Canadian National Railways from St. Paul, two parties of American land buyers comprising twelve persons, left Winnipeg recently to visit the Humboldt and Tisdale districts, where they will inspect Canadian National lands with a view of settling. This is only one of several parties brought in this year by the colonization department, all of whom bought lands, either from the railway or private owners. These people came from Iowa, Illinois and Minnesota.

The Skyscraper Hospital

Patients On Upper Floors Will Get Country Air Healing the sick in St. Luke's Hospital, Chicago, will go under conditions equalled only in the country or in the mountains, although the hospital is located in one of the most congested business districts of the city and on the busiest boulevard. Because it is a skyscraper hospital towering 19 stories, the tallest in the world, patients treated in rooms above the tenth floor will escape the odors, noise and flies which inhabit the lower stratum of air. Thus the convalescent will find himself in an atmosphere as favorable as the resort retreat.

New British Plane Best Ever Built

Two Years Ahead of Other Nations Says Expert

"I have been astounded at the result of the two-seater light aeroplane competition," said a member of the air council and one of the greatest aviation experts in England. "In this branch of aviation we are two years ahead of any other nation."

"No more efficient aeroplane than the Beardmore aeroplane (which won the chief prize) has ever left the earth," stated Lt.-Col. W. A. Bristol, the aeronautical consulting engineer, who kept the records of the competitions.

"Margin of speed is a very good standard of efficiency in an aeroplane, and this machine has a very wide margin. It can fly at about 90 miles an hour. It can rise from the ground quickly and pull up slowly."

"With a two-gallon tin of petrol a light aeroplane will take two people from London to Eastbourne in an hour."

"DIAMOND DYE" IT A BEAUTIFUL COLOR

Perfect home dyeing and tinting guaranteed with Diamond Dyes. Just dip in cold water to that soft, delicate shades, or dilute to rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Dye "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

Canadian History In France

Formation of Historical Society at Versailles Marked By Interesting Event

Descendants of the great Frenchmen who made early Canadian history were the guests of Sir Campbell Stuart, managing director of the Times Publishing Company, at a luncheon given in the Hall of Battles of the Versailles Palace to celebrate the formation of the "Canadian History Society in France."

The society was formed in order to further the collection from French families of documents bearing on Canadian history.

The guests included Senator Raoul Dandurand, representing the Government of Quebec; Duc de Levis-Mirepoix, president of the new society and a descendant of Chevalier De Levis, who succeeded Montcalm in command of the French forces; Marquis de Montcalm, a descendant of General Montcalm; the Duke of Connaught; a delegation of persons prominent socially in Great Britain; and many French Governmental officials and literary persons.

Hon. H. S. Bland, representing the Canadian Government, (toasted France. Premier Herriot responded on behalf of France, and the Duke of Connaught delivered a message from King George.

Clark's Beans with Pork are ready to serve, are deliciously flavoured, perfectly cooked and "Canada Approved" and because they are trouble, fuel and time, and cost but little, you should frequently serve Clark's Beans with Pork.

"Let the Clark Kitchens help you."

Fish For Saskatchewan Lakes

Fifty-four lakes in Province are Stocked With Fish This Season. Parent fish and fry were distributed among 54 lakes in the province of Saskatchewan during the present summer from provincial hatcheries, and reports now being received indicate that the distribution was successfully accomplished and the fish are thriving. Fish have never before been so widely distributed in the province. Among the fish distributed were over 20,000 whitefish; 17,000,000 perch; over 7,000,000 Thurlow Cisco; and over 3,000,000 pickerel.

To insure school children protection from motor cars Los Angeles is building a series of tunnels under streets by means of which children can cross boulevards in safety.

Seed Grain Survey

Reports To Be Made Regarding Shortages In Seed Grain

Announcement has been made by the Winnipeg representative of the Dominion seed branch to the effect that a survey is being commenced to find out where the shortages are in oats and barley for seed and where there are surpluses. Reports will be made regarding seed wheat at the same time, but wholesale shortages are not expected in this grain as with the coarser cereals. W. F. Dlakeman, who makes the announcement, has just returned from a conference of the branch officials in Ottawa, and he states that arrangements are going forward with all speed, in view of the situation arising out of early frosts and bad weather.

World Still Produces Heroes

Forty-eight Medals Awarded By The Carnegie Hero Fund

Three silver medals and 45 bronze medals were awarded by the Carnegie Hero Fund memorial at its fall meeting at Pittsburgh, in recognizing acts of heroism.

Thirteen of the heroes lost their lives, and to the dependents of eight of these, pensions aggregating \$7,140 a year were granted. In addition, in 32 other cases, awards totalling \$30,000 were granted for educational and other purposes.

HIS HEART WEAK HIS NERVES BAD

Mr. Edwin Connell, Porterville, Ont., writes:—"My nerves were in a very bad condition and the least little thing would irritate me very much."

My heart was weak, and after the slightest exertion it would start to flutter.

A Friend Advised Me To Take

Milburn's
Heart and Nerve
Pills

so I got six boxes and took them regularly, and since then I have not had the slightest sign of any trouble with either my heart or nerves, and I will always recommend H. & N. Pills to all those who are suffering from any form of heart or nerve trouble."

You can procure Milburn's Heart and Nerve Pills from any druggist or dealer.

They are put up only by The T. Milburn Co., Limited, Toronto, Ont.

Record In Construction

What is said to be a world's record in grain elevator construction is the claim for the Spillers big 20,000,000-bushel capacity structure at Vancouver.

In 45 days the work-house and bins were completed.

An Oil that is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. This is far indeed enough to attest its excellence, for in all these countries it is on sale and in demand.

He Knew Well Enough Teacher.—"Now, children, what is 'above par'?" Johnny.—"Please, sir, ma!"

Good roads in the United States now cover half a million miles.

GIN PILLS

FOR THE
KIDNEYS

Proper functioning of the kidneys is essential to good health. Gin Pills correct all kidney troubles. Get a box to-day, and be well.

Sees England's Sun Setting

Plea For England and United States To Stand Together

Declaring that "the government of the world has passed into America's hands," Cecil Roberts, British war correspondent and editor of the Nottingham Journal, in an address at Chicago added:

"All we ask of you is not to act too quickly."

"You are going to have in America a new phase—a phase in which the mental and intellectual will clash with the physical and industrial," he said. "If they cannot combine without physical struggle, God alone can save the nation."

"England and America stand as the last two units in the trial of civilization," he added. "Our England's sun is about to set—but it will be a glorious sunset."

Liquor Smuggling To Cease

Take Steps To Prevent Illicit Liquor Supplies Going to U.S. From Alberta

If bordering states in Uncle Sam's land are getting their illicit liquor supply from Lethbridge and other Southern Alberta towns where liquor vendors stores are located, their supply is likely to be cut off to a large extent as a result of efforts of Commissioner Dinning and the staff of the liquor control branch.

His department has said to those in business to supply liquor to those illegally running it into parts where liquor may be sold only illegally and a drive to stop it, as far as possible, is now on.

Hot Foot Bath Takes Off Corns

The stung comes right out, all the pain goes away, the corn lifts off by the roots. This is the actual result that comes from Putnam's Corn Extractor. There is a hot foot bath treatment described in each package. You won't be disappointed. Putnam's is a sure thing for removing corns, calluses, foot bumps, etc. Accept no substitute. 25c at all dealers.

Naval Wars In Future

Nations May Stake Everything On The Issue of a Single Battle

Naval strength, in the last analysis, must be measured as "the blow a ship's gun can deliver at long ranges," Secretary Wilbur declared in a radio Naval Day address at Washington. Efforts to acquire a "homogeneous fleet" for the United States will be unavailable, he asserted, unless the sun elevating machinery on United States battleships is improved to permit all main batteries to reach an average maximum elevation.

"Subject to the construction of the treaty for the limitation of armaments, we are asking Congress to authorize the necessary changes to permit this elevation," the secretary said. "We anticipate that future naval wars will be fought in great fleet actions, where a nation will stake everything upon the issue of a single battle."

New Treatment For Diphtheria

Claim Disease Can Be Stamped Out In One Generation

After years of study and experimenting, diphtheria and scarlet fever have at last been conquered by the medical world, Dr. Abraham Zingher, New York, said in an address at Milwaukee.

"A new and harmless toxin, called Toxoid, has been developed for the treatment of diphtheria," Dr. Zingher said. "This Toxoid gives immunity to those treated with it. So far as is known this immunity is permanent. A child one year old can be immunized for life."

"Diphtheria, which last year claimed 20,000 lives in the United States, can be stamped out entirely in a generation," Dr. Zingher said.

Swine Breeders' Competition

Prizes Go To Manitoba and Saskatchewan Entries

First and second prizes for the best pair of hogs in the competition of the Canadian Swine Breeders' Association, held at Brandon, was won by the estate of Sir William Van Horne, East Selkirk, Man. One Saskatchewan winner was featured in this competition. Ninth prize was awarded to the department of public works, Regina.

Prior to the judging, the first lecture under the Manitoba Swine Breeders' bacon hog short course, was held. J. WILDE, of the Dominion livestock branch at Ottawa, opened the session by a demonstration lecture on "Cured Wiltshire Sides."

The centipede doesn't mind being told that he has one foot in the grave.

BY GROCERS EVERYWHERE

Canada's Trade With Cuba

Received Over Two Million Dollars For Potatoes Exported Last

Potatoes are an article of import into Cuba in which Canadians are interested. In round numbers, Cuba imports yearly about four million bushels of potatoes of which almost one-half come from the United States, with Canada's sales a close second. The total value of these imports last year was \$5,482,283. The value of the imports from the United States was \$2,816,385, and the value of those from Canada was \$2,449,054. Belgium was third, with \$37,409; Great Britain, fifth, with \$36,885; and the Canary Islands sixth, with \$32,655.

Why the Question Is Raised Having studied the war and made a hash of it, Germany naturally resents the onus of being responsible for wrecking Europe.

Had Germany triumphed in the field, there would never have been any international conference as to who started the war.—Toronto Telegram.

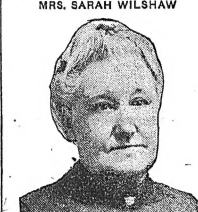

Worms cause fretfulness and rob the infant of sleep, the great nourishment. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Women Boxers In Hull Boxing is prohibited in Hull, Eng., except for women. As a result, female exhibitions of the "manly art" are now attracting hundreds of fans to various ringdies every weekday night.

Bill is developing a crop of women boxers to send to America.

It straightened out, an ounce of spider web would extend 350 miles.

MRS. SARAH WILSHAW

HAVE YOU A DAUGHTER? IF YOU HAVE, THIS ARTICLE WILL INTEREST YOU!

Hamilton, Ont.—"Dr. Pierce's Favorite Prescription is the best medicine I have ever known for the building up of girls and women who are run-down in health. It has been taken by different members of my family with great success. My daughters have been wonderfully helped during motherhood by taking Favorite Prescription. It is the best medicine the mother can take for health and strength. And after having the influenza my granddaughter was left in a very bad way and nothing in the way of medicine gave her the help until she began taking Doctor Pierce's Favorite Prescription, and then the use of this medicine her health was completely restored, and she is as well as ever."

Mrs. Sarah Wilshaw, 425 Cannon St., E. Go to your neighborhood drug store at once and obtain this Prescription of Dr. Pierce's, in tablets or liquid, or send 10 cents to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial package.

To avoid imitations, always look for the signature of *Dr. A. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

Plan Elaborate Research Work For The Eradication Of Rust In Wheat Fields Of Canada

Research work for the eradication of rust in Canada's wheat fields may have its headquarters in Winnipeg if the plans under consideration by the Federal and Manitoba Agriculture Departments mature as expected, and the laboratories will be located on the grounds of Manitoba Agricultural College, says the Manitoba Free Press. Hon. W. R. Motherwell, Federal Minister, and Miss J. A. MacLean and Dean McKillop, of Manitoba Agricultural College, have conferred on a proposal to erect a \$40,000 building with sufficient land for experimental purposes, about 25 acres. The land is offered free to the Federal Department by the Provincial College.

Rust has exacted a heavy toll on crops for 2,000 years, officials state, and it is not expected that its eradication will be accomplished immediately. A feature of the campaign is that it is being framed on a permanent basis. The Federal Government is not expecting that any direct results will be obtained for years and years. No effort will be spared, however, and gradually, perhaps, a solution will be evolved.

The Federal Government will pay for all the research work done and altogether the increase in expenditures should this scheme go through, would be quite large. Mr. Motherwell, it is known, is convinced that all possible avenues of research should be pursued energetically and that the cost should not be the governing factor.

Butter Production Increasing

Expect Saskatchewan Output Will Reach 13,000,000 Pounds This Year

Dairying in Saskatchewan is progressing in a remarkable manner. Production of creamery butter in the province during September reached the high figure of 1,556,291 pounds, as compared with a total of 997,533 pounds in the same month last year. This increase of more than 500,000 pounds in a fall month is the biggest gain in butter production in the province in any one month.

Officials of the Provincial Dairy Branch anticipate the total creamery butter production for 1924 will reach the peak of 13,000,000 pounds, a gain of 3,000,000 pounds over the 1923 high record. Total production of creamery butter in Saskatchewan up to the first of October was 11,000,000 pounds against 9,000,000 pounds for the first nine months of 1923.

Movement to the Cities

Ontario School Census Reveals Shifting Of Population

Twenty years ago there was a marvellous change in the school population of Ontario. Figures published by Premier Ferguson show that six out of every ten school children in Ontario are city or town dwellers. Twenty years ago six out of every ten were country dwellers. The figures aptly illustrate the shifting of the population from the country to the large centres.

Twenty years ago there were over 250,000 children in the rural schools and the latest figures show only 241,000, while the city and town schools have increased their total from 389,000 to 360,000 during the same period.

Hungarian Partridge In Manitoba

Manitoba's Hungarian partridge, released last spring in the vicinity of Warren, Man., have scattered over a radius of from 15 to 25 miles. About 120 birds were originally released and they have multiplied rapidly and taken to their Manitoba homes. As yet they are immune from hunters. Another importation will be made from Alberta this fall.

Amateurs Hear New Zealand

Two amateur wireless experimenters near London succeeded in establishing communication with a New Zealand amateur. They exchanged congratulations by Morse signals, which were confirmed by cable. Only small power was employed with an 80-metre wave length.

Wembley's Deficit Not So Huge

A high official of the Wembley Exhibition estimates that the excess of expenditures over receipts will not amount to more than £1,000,000. It was thought at one time that the loss of the exhibition would be much greater.

Forecast-Air Mail Service

Writing in 1874 on the postal service between Europe and the United States, the Postmaster-General of Prussia said the wireless solution of the problem would be found in a daily mail service by air across the Atlantic.

Short sight is more common amongst town than country people.

W. N. U. 1550

Natural Resources Bulletin

Many Accidents Caused Through Carelessness With Explosives

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

In a review of the annual report of the explosives division of the department of mines one cannot but be struck by the number of accidents caused to boys through the handling of explosives. This has been especially true of detonators, the larger portion of the accidents being caused through curiosity as to what the effect would be when exploded by contact with fire or from the force of a blow. The effect in almost all cases was the loss of portions of the hand or more serious injuries.

Detonators, or caps as they are called when using dynamite and gunpowder explosives. Decomposition must be started by the application of sudden high temperature and pressure. This is effected by firing a small charge of fulminate of mercury which explodes with great violence and sets off the explosive with which it comes in contact. The fulminate of mercury is compressed in small copper tubes which are fired by a fuse. The explosives division suggests that detonators should not be conveyed or kept with dynamite or other explosives on account of the danger of accidents.

The point of this appeal is that the greater care should be taken in the care of explosives, that detonators should be kept away from children, who are naturally curious; that the danger should be explained, and the need for care impressed upon all workmen who are entrusted with the use of explosives, and that both explosives and detonators should be secured against theft by both adults and children. Of the 61 persons injured last year through playing with detonators and explosives, more than forty were boys. These latter will, as the result of carelessness on the part of users of explosives be handicapped for life. The greatest of all the natural resources of Canada is her children; let us therefore exercise every precaution in the care and use of explosives that they may be protected from accidents by this cause.

Unprofitable Poultry

Birds Useless As Layers Should Be Culled From Flock

Experts estimate that nearly half the hens kept by farmers in Saskatchewan are star boarders, getting few chicks without making any return in eggs.

To remedy this situation the extension department of the University of Saskatchewan is willing to send experts to any district in the province to cull the star boarders from registered flocks.

A special culling service has just been started among commercial flocks at North Battleford with the co-operation of the market branch of the Provincial Department of Agriculture, the University of Saskatchewan and the North Battleford Agricultural Society.

Out of 4,300 birds handled 2,300 were culled as star boarders. In other words, the experts in this instance found that 54 per cent. of the birds were useless as egg layers.

Present Challenge to World Fliers

The United States army aviators, who flew around the world, were presented with his cheque for \$7,428.99 by Mayor James R. R. Jr., at a public reception in San Francisco. The money was contributed by "the people of San Francisco." Lieut. Lowell H. Smith, commander of the flight, accepted on behalf of his comrades.

Importance of Printing Industry

As a result of the survey conducted by the newly-formed Graphic Arts Association, printing and allied trades are now shown to constitute the second largest industry in Winnipeg, representing an investment of \$10,054,218, and providing employment for 120,000 people. The report shows that during 1923 the sum of \$3,619,322 was paid in salaries.

World's Highest Radio Phone Station

The highest radio telephone station in the world has been opened at the observatory on the Parc du Midi, some 10,000 feet in altitude. The station uses a 350 metre wave length and has an antenna capacity of 300 watts. The station will render lightning service to agriculture by broadcasting weather forecasts.

A motor car has been invented that can move sideways across the road. It was felt that pedestrians were getting altogether too awful.

The letter "e" is used more often than any other.

Canadian Apple Winner

British Columbia Apples Are Declared The Finest Grown in the Empire

For the second time in successive years the McIntosh Red apple, first produced by the late Henry McIntosh on his Ontario farm at Dundela, near Inverness, has been declared the finest variety of dessert apple produced in the British Empire, but the particular specimen of the fruit which won this great distinction at the Imperial fruit show, which opened at Birmingham, England, on October 24th, was grown at Vernon, British Columbia, and exhibited by the Associated Growers of British Columbia. The first prize for a cooking apple also went to the same place and the same growers. The above are outstanding points in the awards made, information regarding which has been received by the Dominion Fruit Commissioner, Mr. George McIntosh. Hanging in the office of the commissioner is a photograph of the first McIntosh Red tree, which has a tablet erected near it to commemorate the wealth it has added to Canada. So far as Canada is concerned, British Columbia swept the board in the British Empire section.

British Grain Men

Interested In West

Representatives From Old Country Establishments Impressed With Opportunities Here

J. G. Alexander, of the Scottish Co-operative Company, and a representative of the English Wholesale Co-operative Association, are in Western Canada at the present time investigating grain business conditions with a view to expanding their own business with the territory and the establishment of terminal elevators.

Messrs. Robinson and Stevenson, of Rochester, England, who are interested in the flour milling industry, have been investigating conditions in Western Canada. They expressed themselves as entirely satisfied, and stated they would return next year with flour milling machinery and in all probability establish a branch in Western Canada.

New Demonstration Farm

International Harvester Company Seizes Land In Manitoba For This Purpose

A demonstration farm under the management and control of the International Harvester Company will be located in the Brandon district, the announcement having been made that a farm has been secured near Oak Lake to be taken over on January 1st and operated under the direct supervision of its agricultural extension service. This will be the first farm of its kind established in Canada and will be divided into plots for the demonstration of certain kinds of feed and in particular to prove the advantages of mixed farming.

Reforestation Scheme

Ontario Planting Pine Seeds on Burnt Over Lands

A new scheme for the culture and reforestation in Ontario is to be undertaken by the Department of Lands and Forests during the coming month. The department will plant burnt-over and cut timber lands with pine seed but this is more or less in the nature of an experiment; only three of four hundred acres of land will be planted. Approximately 30,000 pounds of red and white pine seed will be used for the production of seedlings for reforestation purposes.

Growing Pure Seed Grain

Alberta farmers are putting more seed on the market this fall than in the past years, according to a present outlook. The officials of the Alberta Government cleaning and marketing plant report that they expect to handle more than 75,000 bushels during the coming season.

Eel Saved Liner

The liner Calcutta docked at Hull, Eng., with her hold half full of water. When it was pumped out it was found that a river had fallen from a bottom plate and an eel had become wedged in the hole, stopping the leak.

The Misses: "What do you mean by kissing our parlormaid the first day she's here?"

The Master: "Well, you see, one can't tell how long she's going to be here."

A large housefurnishing store in Boston insists that its advertising department refrain from using meaningless adjectives and phrases and untruthful or exaggerated statements.

Set Commercial Grades Of Wheat

Wheat Grades For Year Are Fixed At Four, Five and Six

The Western Grain Standards Board, at their annual meeting in Winnipeg, set the commercial grades of wheat as numbers four, five and six, which will be the basis upon which this year's crop will be marketed, lowering to some extent the standard of these grades as compared with last year. Very careful consideration was given to the matter, but it was decided to be as lenient as possible in view of western producers without damaging the reputation of Canadian wheat insofar as grading is concerned.

Whether this will be of direct benefit to the farmers remains to be seen, in the opinion of grain men, as the premium will sufficiently win out any advantage that may be secured in the lowering of the grades.

The grade number two feed was eliminated entirely.

Sugar Factory For Alberta

American Company May Establish Beet Sugar Factory In Irrigation Block

The Utah-Idaho Sugar Company has approached the provincial government for assistance in connection with establishing a beet sugar factory in the southern part of the province, probably in the Canadian Pacific irrigation block. It is stated that the government looks favorably upon the proposition, but will not doubt furnish the required assistance to establish the project. Experts of the Sugar Company have been making investigations in Southern Alberta in regard to the growing of sugar beets on a commercial scale, and it is understood that their report has been favorable towards the establishment of a plant in Southern Alberta.

Last Year's Crop

Summary Shows Big 1923 Crop By Provinces

According to a detailed summary released to the movement of the 1923 wheat crop by a Winnipeg newspaper, the total production of marketable wheat in the Canadian prairie provinces last year approximated 442,082,913 bushels. By provinces the output of the 1923 wheat crop is shown as follows:

Alberta, 124,495,350 bushels; Saskatchewan, 270,660,510 bushels; Manitoba, 36,578,530 bushels.

The greatest discrepancy, it is pointed out, was shown in the crop estimates and the actuals in the province of Alberta, where the estimate for Alberta was placed at nearly 15,000,000 bushels higher than the final output indicated.

Noted Inventor Dead

Patrick Delany Was Friend and Associate of Edison

Patrick Delany, inventor and for fifty years a friend and associate of Thomas A. Edison, died at his home in South Orange, N.J., not far from the Edison home, at the age of eighty years.

One of his inventions, a detector of precious metals, resulted in the location and recovery of \$300,000 in gold and silver from the sunken liner Laurentic off the coast of Ireland recently. This device was used again last year by a wrecking company in New York Bay to recover \$200,000 worth of copper ingots.

Wanted Her Fish

Not long ago a well-dressed man who was travelling in a third-class railway carriage in County Cork sat down hurriedly next to a nice little girl in Shawl and elgus. Suddenly it dawned upon him that he was sitting of her newspaper.

"Here, my dear," he said, pulling the paper from under him and handing it to her, "I'm sorry."

But the little girl did not look quite satisfied; she said nothing till a few minutes later. "Then," "Please, sir," she inquired meekly, "may I have my fried fish that was in it?"

Stunt Actor Drowned

William Harbrough, 25, movie stunt man, was drowned in the Colorado River at Yuma, Arizona, during the filming of a "western" picture. He was swept down stream when flood waters were released by the opening of the Laguarda dam to carry out the realism of the production.

Advance In Surgery

From 30 to 38 per cent. of the surgical operations of the future will be performed with the aid of a regional anaesthetic, which eliminates pain, but leaves the patient conscious, according to Dr. Gaston Labat, French surgeon.

While we have a great deal of respect for old age, we draw the line at hoarding-house spring chicken.

A man doesn't always do his duty when he does something he wants to do.

Large Amount Of Foodstuffs Required Each Year In Supplying Canada's Table

Canada's Oyster Industry

Output In Recent Years Has Been On The Decline

Oysters have been known and used as food from the periods of Greece and Rome. In many countries they are now, due to depletion of the oyster beds, almost a luxury. Canada has shared, in large measure, in this depletion, and what were at one time productive oyster areas, are now supplying but a small proportion of the output of earlier years. Canada's total production of oysters in 1923 amounted to 22,949 barrels, while in 1910 it was 29,737 barrels, and in 1900, 46,226 barrels. In 1882 Prince Edward Island alone produced 57,042 barrels, the total Canadian output for that year being 66,646 barrels.

The great reduction in the output of Canadian oysters may be traced to several causes, says the Natural Resources Intelligence Service of the Department of the Interior. One of the chief of these is over-fishing, due to the high prices that were obtained in the early years of the Canadian oyster fishery there was considerable indifference to its possibilities, oysters were used by few people and then more as a novelty than as a staple article of food. In the meantime, however, improvements in transportation had made it possible to place the product on the inland markets, which at once created a heavy demand. The at first locally abundant cheap oysters rose in price, and this incentive to greater production led to the search for and exploitation of all the possible oyster-bearing areas, until it was feared that the beds would be depleted and the oyster fishery pass into history.

Of the 491,239,000 bushels of oats grown in 1923, there was consumed in Canada 167,678,000 bushels. The quantity of oats used for human food in 1923 was 11,914,617 bushels which was converted into 145,912,514 pounds of rolled oats or oatmeal, of which 109,220,512 pounds was used in Canada.

Cornmeal, also, was used to the extent of 51,202,067 pounds, while 2,659,910 pounds of rye flour, 5,631,225 pounds of buckwheat flour, 1,011,053 pounds of barley and 50,423,000 bushels of potatoes, contributed to Canada's table supplies.

Farm and ranch animals provided 1,291,212,492 pounds of meat, together with 230,507,222 pounds of butter, 21,272,216 pounds of cheese and enormous quantities of milk and cream.

How dependent Canada is upon natural conditions, as they pertain to precipitation and temperature, is evidenced by the wheat crops of 1921 and 1922. The increase in production in the latter year, notwithstanding that there was less acreage sown to wheat, averaged five bushels per acre, or a total of 104,507,500 bushels—the difference being more than enough to provide all of Canada's requirements for four months.

While Canadians are not great fish consumers, nevertheless very large quantities are required to maintain our tables. Salmon, lobsters, herring, cod, halibut and many other varieties are available, and of recent years a number of species heretofore not regarded as edible are being made available.

Table and dairy salt produced in Canada in 1923 amounted to 41,724 tons and common fine salt to 35,758 tons. Minerals also enter into the provision of our meals in the form of table cutlery, culinary utensils, stoves, etc., while to a large extent coal, oil, natural and artificial gas, and other mineral products supply the necessary fuel.

Peace River Fruit

Many Varieties of Fruit Produced in Quantities This Year

The first plums to be garnered in the Peace River country were plucked from a three-year-old tree at the Beaver Lodge Experimental Farm, of good size and color, and most delicious flavor. The tree was secured in North Dakota and clearly demonstrates that the Peace River country is capable of producing hundreds of varieties of fruits that were believed by the skeptical to be impossible of maturity. Sand cherries, apples and numerous other trees have come into bearing this year. So prolific has the growth of red currants been this year that the Canadian record was equalled for production per bush.

Canada's Wool Clip

Production This Year Will Total Thirteen Million Pounds

Western Canada's wool clip this year will total 13,000,000 pounds with a value to sheepmen of \$4,000,000, according to a bulletin issued by the Dominion Department of Agriculture. The quality of the product is said to be higher than last year. Approximately half of the wool clip will remain in Canada for manufacture, the balance being exported to the United States and Great Britain.

Motors Run 1,000 Hours The powerful Maybach motors, installed in the Zepplin ZR-3, for her trip from Germany, are capable of running 1,000 hours without overhauling, according to American aeronautic experts. The best record attained by American-made motors is 500 hours of continuous service.

Machine Gunners Re-unite

Officers from as far west as Vancouver attended the annual reunion dinner of the officers of the Canadian Machine Gun Corps in Toronto recently.

A girl seldom maps out a career until after she has been disappointed in love.

Three meals per day for the 8,775,853 people in Canada in 1921 would mean 26,227,559 meals daily, or 9,999,456,935 yearly.

What a quantity of foodstuffs is required to supply these meals, and what a variety must be provided.

Where it all comes from, and the interests represented in its collection and distribution, would make a most interesting story, says the Natural Resources Intelligence Service of the Department of the Interior. The object of this article, however, is to direct attention to the effect of the development of our natural resources upon the provision of our food supply—the means whereby it reaches our tables, and what natural resources enter into its preparation.

Canada's chief food supply, of course, comes from the farm, consequently it is upon the development of Canada's greatest natural resource—the land—that our people depend for sustenance. Agriculture supplies us with not only our bread and butter, but our meat and vegetables, our dairy and poultry supplies and our fruits.

Of the total wheat crop of 339,788,000 bushels in 1923, 170,104,000 bushels was consumed in Canada. How much of this was converted into flour is not as yet known, but in 1922 there was 81,415,649 bushels milled, from which was produced 17,539,131 barrels of flour. Of this flour 8,698,978 barrels was consumed in Canada, slightly less than one barrel for each person.

Of the 491,239,000 bushels of oats grown in 1923, there was consumed in Canada 167,678,000 bushels. The quantity of oats used for human food in 1923 was 11,914,617 bushels which was converted into 145,912,514 pounds of rolled oats or oatmeal, of which 109,220,512 pounds was used in Canada.

Cornmeal, also, was used to the extent of 51,202,067 pounds, while 2,659,910 pounds of rye flour, 5,631,225 pounds of buckwheat flour, 1,011,053 pounds of barley and 50,423,000 bushels of potatoes, contributed to Canada's table supplies.

Farm and ranch animals provided 1,291,212,492 pounds of meat, together with 230,507,222 pounds of butter, 21,272,216 pounds of cheese and enormous quantities of milk and cream.

How dependent Canada is upon natural conditions, as they pertain to precipitation and temperature, is evidenced by the wheat crops of 1921 and 1922. Minerals also enter into the provision of our meals in the form of table cutlery, culinary utensils, stoves, etc., while to a large extent coal, oil, natural and artificial gas, and other mineral products supply the necessary fuel.

Flour For the Orient

Japanese and Chinese Are Now Demanding Whiter Bread

With the Japanese and Chinese becoming keener than ever on wheat bread in place of the one-time staple diet of rice, Spillers, Limited, of London, England, expects to establish a large trade with the Orient according to a director of the company in Winnipeg. It was explained that the grain would be shipped from the Calgary mill which should be in operation by next spring while the elevator at Vancouver will be used for storage of grain for shipment to Great Britain via the Panama Canal as well as for shipment to the Orient.

Call Found Bess Indigestible

A calf belonging to James Morrison, of West Town, New York, paid the penalty for its fatal antipathy to bees. Tethered near the Seebies, the calf frequently has hawled the bees out. One day it bickered over a hive and began to eat the bees. Its tongue and throat became so swollen from stings that it died from asphyxiation.

Pertinence must be drawn from the bloom on the day that it is plucked. In twenty-four hours the delicate aroma is almost gone. Many flowers are required to produce small amounts of the perfume. It takes about two tons of violet blossoms, for instance, to make about two pounds of essence of violets.

(Continued)
"I lost out with the sky-pilot and Miss Dupurel because I wouldn't storm the gate," Brewster concluded regretfully. "About that time appeared this Sergeant Scarlett, who offered me a mining expert. He felt hard for the girl, which is not against him, for there isn't a finer in all I know than Miss Ruth. I don't know what he thought of the monopoly or what he intended to do when he got into uniform. As you know, the stage nobbers liked him before he got saddled up."

"What do you make of it yourself?" Brewster shrugged his broad shoulders. "I may be prejudiced. You see, while I lost my best girl, I landed my B. & K. picking contract. I'll say they pay their bills. Hope you won't think I was trying to horn into your game by criticizing your camp selection. But I thought you might not know how things stood on Glacier."

Seymour thanked him, then glanced into the river. "Maybe I like the looks of the Cheena," he added.
"Scouting for drover people, eh?" Brewster made a grimace. "I would be cleaning up strong in the Klondike. The Cheena ought to pay rich for anyone with money enough to put in a hydraulic plant. Remember that Philip Brewster is in the freighter business in case you both operate. Good luck to you and goodbye for the present."

The sergeant watched Brewster ride across the flat to the main trail; and when he turned back toward the creeks. Evidently the freighter had been riding into the mountains, he said, Seymour's release. An oblique individual Brewster, even if he had given his fat deputy friend foolish advice about holding back the Mount-

ed. So Glacier was a closed creek. A guarded "gate" had been swung across its canon mouth. Upon what? Upon Bart Caswell's something "richer than gold," he strongly suspected. Perhaps upon the "sergeant's" slave as well. Seymour was part Irish; he enjoyed passing the impassable—or trying to.

CHAPTER XXII. A Figure Of Speech

Carrying an empty tin pall from his mess outfit, to lend borrowing-color to his neighborly call, Seymour trudged openly to the mission. This proved to be a sizeable log structure without cross or belfry, which served both as dwelling for the missionary and a place for the Indians to worship. It had been up several years, from the dead look of the logs. The timber was upon Glacier Creek farther than upon the Cheena. A forest of scrubby cedar and fir skirted the base of it, while not far away was that misplaced rock spur which formed one flank of the closed canon.

His coming was announced in chorus by several matamoras chained to individual dog houses in the front yard. The venerable old minister himself was at the front door ready to admit him.

"You are welcome, brother—more than welcome," was his greeting. "Your arrival relieves my daughter of the necessity of riding to Gold to see you."

DOCTOR ADVISED AN OPERATION
Read Alberta Woman's Experience with Lydia E. Pinkham's Vegetable Compound
Protest, Alberta.—"Perhaps you will remember sending me one of your books a year ago. I was in a bad condition and would suffer awful pains at times and could not do anything. The doctor said I could not have children unless I went under an operation. I read testimonials of Lydia E. Pinkham's Vegetable Compound in the papers and a friend recommended me to take it. After taking three bottles I became much better and now I have a bonny baby girl four months old. I do my housework and help a little with the chores. I recommend the Vegetable Compound to my friends and am willing for you to use this testimonial letter."—Mrs. A. A. Adams, Box 54, Fort St. John, Alberta.

Pains in Left Side
Lachine, Quebec.—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my left side and back and with a weakness and other troubles women so often have. I was in this way about six months. I saw the Vegetable Compound advertised in the 'Montreal Standard' and I have taken four bottles of it. I was a very sick woman and I feel so much better I would not be without it. I also use Lydia E. Pinkham's Sanative Wash. I recommend the medicines to my friends and I am willing for you to use my letter as a testimonial."—Mrs. M. W. Ross, 580 Notre Dame St., Lachine, Quebec.

sure us that nothing has happened to you." Your daughter— I thought I'd met your niece. Circumstances beyond my control made last night's appointment." Seymour's excuses were interrupted by the sudden entry, from what seemed to be the kitchen, of Moira, a radiant surprise in a blue gingham upon her face. She had just returned from her riding boots, testimony that she, not the blond Ruth, had been about the house. "When—?" was all he was able to gasp as he reached out for both her hands.

"Last night's stage— To think that you— Oh! Ruth has told me all about how finely you've taken hold of the situation!" "And Miss Ruth—where is she?" he asked.

"She's had a hard blow in the death of a man she had come to trust. Isn't it enough—glad enough that I'm here, Sergeant Scarlett? I know you must be hungry after that long ride from town. In a minute-and-a-half—"

Seymour reassured her, telling of the persecution he had taken to cover his visit by establishing camp near by. He pointed to the bucket. "Anyone of a man she had come to trust. Isn't it enough—glad enough that I'm here, Sergeant Scarlett? I know you must be hungry after that long ride from town. In a minute-and-a-half—"

"Then, brother, if you'll pardon me, I'll hand you over to Moira," said the missionary. "I'm somewhat of a work-toiling less than the translation of the Epistles into Chinook. I am of the long established policy of daughter and my niece for my time is short—my time is short. You will find her most kind and most fully informed in the details of this outrageous intrigue than I am myself. In this grievous time of turmoil which has befallen us, I thank the good Lord every hour for the return of such a daughter."

"Father, dear!" she gently hushed him. While the girl was engaged in settling him at a table near a window and arranging his books and papers, Seymour glanced about the comfortable living room. Every stick of furniture, of the long established policy of daughter and my niece for my time is short—my time is short. You will find her most kind and most fully informed in the details of this outrageous intrigue than I am myself. In this grievous time of turmoil which has befallen us, I thank the good Lord every hour for the return of such a daughter."

"Frog-gold," my father calls that stuff, the girl said. "It's the plague of our Glacier Creek placers, cluttering up our sluices and utterly worthless except in rare instances, such as this." She ran her eyes over the specimens and picked out one that was shaped curiously like a human hand. In the gray palm was a small nugget of gold, worth possibly a dollar.

"Make this one as a souvenir of my first visit to the mission," she said, and held it out to him. He had been on the point of asking her for one of the carols, because of a possible connection with the case that had occurred to him, so accepted the gift gladly.

"You know the real story of the closing of Glacier Creek, Moira?" he asked, the matter-in-hand always on his mind.

"I heard it all last night from father and from Ruth," she assured him. "This pretended humbly who has just been murdered made an inspection of the creek in father's behalf because of his love for his cousin. It's a terrible story, I tell you."

"This Bart Caswell made friends with a hired gunner, one Bonnemont and Kluger had on guard and slipped into the gulch where the claims are located. He showed great skill in keeping under cover and was not discovered until the next afternoon, by which time he had seen more than enough."

"His report," Moira went on, "was worse than father had feared. The conscienceless scoundrels had killed all of our people, plying them with liquor and working them heart-rending hours under the whip. Bart thought the slaves knew their days of oppression were numbered, and were trying to strip the claims of their value. The shortest possible time. Undoubtedly the guard at the gate was as much to keep the slaves in as the whites out of affairs. Do you wonder that father is beside himself with anxiety, realizing his impotence until Canada wakes up to what is going on?" There was no doubting her honest rage, or that it was unselfish, as neither her cousin's claim nor her father's was being plundered.

"Did I understand you to say that Bart had discovered up the gulch?" Seymour asked. "Bonnemont himself discovered him slipping through the brush near one of his long sluice boxes. Moira informed him. 'He would have beaten Bart to death had not his partner Kluger, who was put to rest by the combination, didn't want a white man murdering a colored man, as he put it. They brought Bart to the gate and literally kicked him into the open, warning him that he had no second chance. If over they caught him trying to spy,

EECHAM'S PILLS
Safest and best family medicine

on them again, they threatened to shoot him on sight." Seymour recalled the widow's version, undoubtedly the true one concerning Bart's motives and motives processes regarding the Glacier Creek plunderers. "Until that uniform fell into his hands, he did not see any way of getting the best of them," Mrs. Caswell had told him.

Bart's plan from that point was easily deduced. Once in uniform, it had been necessary for him to "stall" in regard to the labor murder—to checkmate the whites with any citizens' investigation by pretending to make his own. He seemed to have found time, too, for a reassuring visit with Ruth. Dupurel was permitted to advance whatever personal game he was playing with the girl.

Yesterday morning the impostor had set out for the guarded canon on Glacier Creek, counting on the magic of the military uniform, which, for once, had failed to cast its spell. Possibly this failure was because the plunderers had recognized the impostor. But the sergeant was not ready to credit that explanation. He preferred to think of it pointed to the military uniform, the false claims, which would not hesitate to aid the murder of a non-commissioned officer to their own ends.

The sergeant was forced to admit to himself the neatness of Bart's scheme as he now surmised it. Had the uniform "worked" as the Indians' claims, once the treasure was in his possession, he would have made off with it over the conveniently southbound steamer. He touched at no British Columbian port. Just possibly, because of that gift of tongue with women, which Seymour already had seen evidence, Bart would have persuaded Ruth Dupurel to accompany him to his feet.

"I'll give the Glacier diggings a look-over," he said with a decision that was not as sudden as it sounded, and he turned to the girl. Seymour's expression showed as little concern as though he proposed to go to the door to knock at the wealthy prospects. He was not underestimating the risks that would come with an attempt to work his way into the mine, but he was ignoring them so far as any surface indication was concerned. From the scout he was determined to make he had every hope of getting the needed direct evidence; at least, he would determine what was "richer than gold," the sergeant said. Caswell to tempt fate one too often.

"You'll never get past the gate," Moira cried, despair and anger in some disappointment that he had taken on her own arrival so placidly. "Bonnemont himself has taken charge of the guard there. He was there yesterday morning and yelled to Ruth: 'Tell your friend a uniform makes a fine target.' It was that with that threat that sent her toward town with her top-toe warning. This morning, when you had been delayed, I went over to the creek. He was there, but kept silent—even when I called him a murderer. I tell you, Sergeant Scarlett, darling, the canon is closed!" (To be continued.)

Making A Life

Quite A Different Thing To Making A Living

"There is an everlasting distinction between making a living and making a life." These words by Gov. William Russell, of Massachusetts, are engraved on our hearts.

Most people can make a living some day. If by living we mean only food and shelter. But to make a life of meaning, of value, that is the real task that is set. How to go about it is the art of living; but we believe that the secret key, the direction, is implanted in every man's heart. What would be the right sort of life to one man will not be so to another. Each has some sort of work laid upon his conscience—it may be bridge building, it may be the writing of poems, it may be store-keeping. Whatever it is, he knows, and in the depths of his heart he knows whether or not he is fulfilling the secret command to the best of his ability. If he does that, it matters little whether or not he has attained what the world calls success. He may not even have succeeded in making a living. But he has built a life.—Ohio State Journal.

British All-Metal Plane
A great all-metal plane, driven by three 1,000-horsepower engines, capable of a 2,000-mile non-stop flight, will be constructed for the All-Red Empire route. This is the London-Cairo trip with a relay at Malta, worked with two planes of the type described above. By this means passengers and mail can be laid down at Cairo 31 hours after leaving London, including one hour stopover at Malta to change planes.

No Chance
Ethel—"Does Gladys ever lie about her age?" Clara—"How can she—with a twin brother?"

Father, as much as anyone needs SCOTT'S EMULSION

A Saskatchewan Artist
Paintings By Jas. Henderson Are Of Surprising Merit
An elaborate exhibit of paintings by Jas. Henderson, Fort Qu'Appelle, was shown in Regina, October 30 and 31, and November 1, and the work of this Saskatchewan artist won golden opinions from the hundreds who visited Regina College while the exhibit lasted.

The University of Saskatchewan has invited Mr. Henderson to bring thirty or forty pictures to Saskatoon and spend ten days at the "U" while the students and the folk of the northern city make the acquaintance of him and them.

Landscapes painted in the Qu'Appelle Valley form a large part of the pictures shown, and these include studies at different seasons of the year. Morning and night effects appeal most strongly to Mr. Henderson, and he has several paintings of rare beauty picturing soft glimmering moonlight valleys; pale amber ends of days; or fresh sweet morning colors of sky and lake.

A very special turn which Mr. Henderson's art has taken has been towards portraiture and his unsurpassed paintings of George, Blackfoot, Sioux and other tribal chiefs are the admiration of all Canadians who know them. As one of his Indian heads has been at Wembley all summer, it at least has grown familiar to many thousands who are not Canadian.

A Jewelled "Paradise"

Exhibit in Indian Pavilion at Wembley Valued at \$12,000

At a Jewelled "Paradise" supposed to represent the abode of Vishnu, the preserver in the Hindu Trinity, which was on view in the Indian Pavilion at Wembley is valued at approximately \$12,000. The whole background was of precious jewels; mountains are made up of emeralds, while sapphire elephants are roaming in the forests. The eagle is carved out of rubies, and the figure of Vishnu is done in emeralds. Over 1,000 pieces have been used in this splendid model, and the artist has almost recklessly chopped off pieces from rubies and emeralds in order to represent human beings or animals. Valhalla, as this paradise is called by Hindus, is considered to be the highest of heavenly abodes.

The Careful Blind

Find New York Easy Place To Get About

Because New York is a city of sounds, the blind find it the easiest place in the world in which to get about. The metropolitan blind acquire the awareness of the woodman in their travels. They few have ears to take them about. They are the hunter and hunted and find a warning in the rustle of a falling leaf. People with good eyes are daily run down and killed, but among all the blind of New York, there has not been a street accident in a year. In their black world the process of compensation is in the honk of the motor, the rattle of cars, the cry of newspapers and the clatter of elevated trains.—New York Correspondent.

Had Quaker Hobby

Saskatoon Man Owned Largest Collection of Walking Sticks Known

Thomas Houlding died recently in Saskatoon, where, for many years he was a factor in the city's building operations. He owned considerable property there during the building period. Houlding was best known as the man who carried a different walking stick every day. Collecting walking sticks was a hobby with Mr. Houlding, who had the largest and most representative collection of any man ever known.

Quick Work

The ZR-3 in its flight from Germany to the United States made an average speed of 61 miles an hour. At that rate it would go from Halifax to Liverpool in 40 hours, and from Newfoundland to Ireland in little more than a day.—Toronto Globe.

Two Kinds of Madness

Payne—"I tell you my love for you is making me mad—mad." Barbara—"Well, keep quiet about it—it has the same effect on father."

Amazing Cases of Longevity

Aged Woman Scrubbed Floors of House of Parliament Since Confederation Days

With the Cabinet act officially coming to an end, and the resultant retiring of several hundred civil servants, amazing cases of longevity were remembered. One woman of over 90 had been scrubbing government floors since Confederation days. Now floors had been laid to replace those worn out, but that she remembered 1920, a total of 1,200 persons have been retired under its provisions.

Africa Wants—Rainmaker

Hatfield May Have Chance to Work on Sahara Desert

The fame of Charles N. Hatfield, as a result of his rainmaking undertakings in California, has reached Africa, where he may have an opportunity to try his cunning on the Sahara Desert. The King's County Chamber of Commerce, Hanford, Calif., announced it had received an inquiry concerning Mr. Hatfield from Tunis in French West Africa.

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little one she will use nothing else. The Tablets give such results that the mother has nothing but words of praise and thankfulness for them. Among the thousands of mothers throughout Canada who praise the Tablets are Mrs. David A. Anderson, New Glasgow, N.S., who writes:—"I have used Baby's Own Tablets for my children and from my experience I would not be without them. I would urge every other mother to keep a box of the Tablets in the house. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and make teething easy. They are sold by medicine dealers, or by mail at \$1.00 from The Dr. Williams' Medicine Co., Brockville, Ont."

Smallest Book In B.C.

Measures Three-quarters of an Inch by One
What is possibly the smallest book in British Columbia is owned by Mrs. F. W. Crowther, of Vancouver. It measures three-quarters of an inch by half inch, and was printed in London by A. Scholts. It is called the Eng-lish Almanack and is a pocket-sized book, which is gilt-edged and leather bound, contains much interesting information on court matters in type that is clear and easily read.

A camera has been invented which can expose a photographic plate for one 200,000th part of a second.

Many Secure Homesteads

More than fifty homesteads were taken up through the Dominion Land Office at Edmonton during the month of September, by new settlers coming into Alberta.

The Hindoos have a belief that evil spirits are especially prone to afflict women and children immediately after the latter have eaten candy.

For those Smokers who like their tobacco Cut Fine or who roll their own MACDONALD'S Fine Cut

1/2 lb. tin 80¢

1/2 Lb. — 15¢

BALDWIN HAS FORMED HIS NEW CABINET

London.—Stanley Baldwin, the new premier, has lost no time in drawing up the list of his new cabinet, which was submitted to, and approved by, the King.

The appointments announced are as follows:

Chancellor of Exchequer.—Winston Churchill.
Secretary for India.—Earl of Birkenhead.

Colonies.—Lieut.-Col. L. C. M. S. Amery.

Foreign Secretary.—Austen Chamberlain.

President of the Council and Leader of the House of Lords.—Marquis Curzon.

Privy Seal.—Marquis of Salisbury.
Lord Chancellor.—Viscount Cave.

Home Secretary.—Sir William Joynson-Hicks.

Agriculture.—Edward Frederick Lindley Wood.

First Lord of the Admiralty.—William Clive Bridgeman.

War.—Sir Laming Worthingham Evans.

Air Minister.—Sir Samuel Hoare.

Health.—Neville Chamberlain.

Labor.—Sir Arthur Steel Maitland.

Board of Trade.—Sir Philip Lloyd-Greame.

Education.—Lord Eustace Percy.

Secretary for Scotland.—Sir John Gilmour.

Attorney-General.—Sir Douglas M. Hogg.

Mr. Baldwin's official position will be the Prime Minister, First Lord of the Treasury and Leader of the House of Commons.

On the whole, the new cabinet is likely to be well received by the country, but Premier Baldwin supplied two first-class surprises, the first, in killing the fatted calf for Churchill, a newcomer to the ranks of Conservatism, which he deserted 20 years ago, and the second, which is generally held to be a consequence of the first, in the exclusion of Sir Robert Stevenson Horne.

No Truth In Report

Denied That Princess Mary Will Visit Canada Next Year

London.—The lady-in-waiting to Princess Mary informed the Canadian press that there was absolutely no truth in the report that Princess Mary would visit Canada next year.

The report that the Princess probably would pay a visit to Canada in 1925 arose in connection with the return of the Prince of Wales from the Dominion recently, when it was said His Royal Highness had intimated that his sister would likely be going out next year.

Cut Down U.S. Flag

Tokio.—Riehe Okada, who cut the United States flag from the flagstaff in the grounds of the United States embassy, July 1 last, during demonstrations against the United States Immigration Act, excluding oriental immigrants from that country, was sentenced to six months imprisonment.

Winnipeg Mayorality Contest

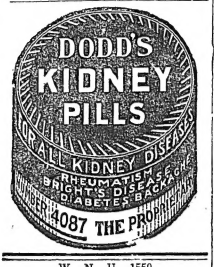

Winnipeg.—Mayor S. J. Farmer will appeal to the civic electorate for his third term, as candidate of the Independent Labor Party. He was nominated by acclamation at a convention of the party. The election will be held on November 23. Col. R. H. Webb is opposing candidate.

Pneumonia Plague Victims

Los Angeles.—Official records show a total of 26 deaths since the beginning of the pneumonia epidemic. Several other patients are still under treatment and health authorities are hopeful that the peak of the epidemic has been passed.

To Aid Zionist Movement

London.—An estate which will be eventually worth a million pounds has been left for the benefit of the Zionist movement by the will of an English Jew. The fund will be used to "restore the Jews to their ancient home in Palestine."

W. N. U. 1550

Collect Insurance On Loss Of Jewelry

New York.—It was reported in insurance circles here that payment of \$125,000 to Lord and Lady Mountbatten and Mrs. J. S. Cosen, for the loss of jewelry stolen at Mrs. Cosen's home at Sandringham during the Prince of Wales' visit there, had been ordered. Lloyd's and the Alliance Insurance Company, it is said, made the payments which were ordered after the Prince's arrival in London. No trace of the thief was found.

Aftermath Of War

Boy-Emperor of China Has Taken Leave of Imperial City

Peking.—In consequence of the decision of Peng Yü-Hsiang, head of the new Chinese military regime, to take over the imperial city, in accordance with the Manchurian abdication agreement, the "boy-emperor" Hsuan Tung, and entire family have taken up their residence at the palace of Prince Chian, the former regent.

The Manchurian dynasty was overthrown as a result of a revolution which broke out in 1911. The emperor abdicated on February 12, 1912, being guaranteed favorable treatment and a pension of \$4,000,000 a year by the new republic. Hsuan Tung, the former emperor, has been living in the imperial palace in the "forbidden city" since his abdication, but his pension has long been in arrears. On several occasions it has been reported that Hsuan had been forced to sell valuable heirlooms of his family in order to meet expenses.

Russia Will Not Buy Western Horses

Difficulties Over Payment End Deal For This Year

Calgary.—Alberta will not sell any horses to Russia this year, the negotiations, which were in progress for several months, having fallen through due to difficulties over finance. The Russian Government wants 1,000 Canadian horses delivered at Odessa, and probably the greater number of these would have been bought on the prairie had satisfactory arrangements been made. The intending purchaser was to pay, through a London bank, after delivery at Odessa, but the Canadian selling agents insisted on payment being made at Montreal at the time of shipment. A deadlock was reached, with the result that the London, Eng., intermediary has left for the old country. It is possible negotiations may be re-opened in the spring.

The Russian Government intimated that, if the first thousand horses bought in Canada gave satisfaction, it was prepared to purchase 15,000 more in this country.

Prince Henry May Succeed Lord Byng

Name Most Frequently Mentioned For Canada's Governor-General

London.—That a successor to Lord Byng, when the time comes for him to relinquish his appointment, will be one of the royal princes is taken for granted in official circles here, and Prince Henry's name is that most frequently mentioned since the Prince of Wales returned from Canada. It is admitted on all sides that the young prince would make an excellent governor-general.

Commercial Treaty With Spain

Ottawa.—The first step in negotiations which may result in a commercial treaty between Canada and Spain has been taken by the Canadian Government. W. McE. Clarke, Canadian trade commissioner in Italy, has been instructed to proceed to Madrid to open up preliminary negotiations with the Spanish Government.

Coal Strikes Averted

Ottawa.—That the threatened strike in the Alberta coal fields has been averted is indicated in a telegraphic advice received by the Labor Department from the Edmonton Miners' Federation. The advice states that an agreement has been reached with all operators concerned on the basis of the finding of the conciliation board.

Voter 104 Years Old

Jameson, N.Y.—Among the first voters at the polls in Jameson was Amy E. Price, who was 104 years old last June. She took her place in the line of voters, waited her turn and asked no help in the manipulation of the voting machine.

Holdfast Elevator Burns

Holdfast, Sask.—A loss of \$12,000 occurred here when fire was discovered in the Province elevator. The elevator, engine room, 1,500 bushels of wheat, 1,200 bushels of flax and about 700 bushels of oats, were destroyed.

MEETS TRAGIC END

PETER VEREGIN

head of the Doukhobor colony of British Columbia, who was killed with five others in an explosion on a C.P.R. train, near Farron station, B.C.

Close Mexican Consulate

Break With Britain Affects Dealings With Canada

Mexico City.—All Mexican consulates in Canada and the other British Dominions have been ordered closed, beginning November 20. The order was issued by the minister of foreign affairs in carrying out the policy to sever commercial relations with Great Britain, which suspended official dealings with Mexico after the recent withdrawal at the request of Mexico, of H. S. Canard Cummins, the British charge d'affaires here.

COOLIDGE WINS GREAT VICTORY OVER OPPONENTS

New York.—The returns of the general elections in the United States show that President Coolidge with about 100 votes to spare in the Electoral College, and will have the largest popular plurality in history.

The indicated strength of the three candidates in the Electoral College is as follows, subject to revision: Coolidge, 367; Davis, 135; La Follette, 12. The figures given for the popular vote are: Coolidge, 18,000,000; Davis, 8,000,000; La Follette, 4,000,000.

Washington.—Several changes are expected in the administration personnel when President Coolidge takes the official oath of office next March 4.

There have been distinct indications that certain officers high up in the government desired, for various reasons, to retire to private life, including some cabinet members.

Mr. Coolidge, naturally, will be free to select his own cabinet for his full term. Those members who desire to leave are expected to communicate their wishes formally to him before next March.

Elevator Charges

Pools Seek Agreement With Elevators As to Special Binned Wheat

Winnipeg.—Officials of the Canadian Co-operative Selling Agency, the distributing organization of the prairie wheat pool associations, and representatives of line elevator companies were in a conference here.

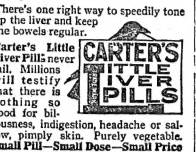

A difference of opinion exists on the handling of special binned wheat and platform loadings, and their subjects were fully discussed during the meeting. The pool officials claim there should be no charge for diversion of special binned grades. The elevator companies at present charge one cent per bushel.

Rheims Menaced By Floods

Rheims.—The heavy floods in the city of Rheims and vicinity have assumed alarming proportions. Eight hundred families have abandoned their homes in this city, several villages having been evacuated and cut off from outside communication and a number of leading roads in the district are impassable.

Liver and Bowels Right—Always Feel Fine

There's one right way to speedily tone up the liver and keep the bowels regular. Carter's Little Liver Pills will testify that there is nothing so good for biliousness, indigestion, headache or salivary, simply skin. Purely vegetable. Small Pill—Small Price—Small Price.

Suggest Devonshire As New Colonial Secretary

London.—In Dominion circles here the return of the Duke of Devonshire to the office of Colonial Secretary under Premier Baldwin would be warmly welcomed. There seems to be no ground for assuming that the Duke has a real distaste to taking office again, and, among the recent colonial secretaries, none created better relations between the Dominion and the colonial department than the former Governor-General of Canada.

Hungarians Would Come To Canada

Representative of People Asks That Restrictions Be Modified

Montreal.—Dr. Aladar Gedeon, former governor of several Hungarian counties, and member of the Hungarian Government, who has been making a short tour of Central Saskatchewan and Alberta, is in Canada in the capacity of a private citizen seeking to purchase an agricultural estate upon which to settle himself and the several hundred farmers who are now engaged in Hungary.

Dr. Gedeon said that if the Canadian Government can see its way clear to modify some of the restrictions against the immigration of Magyars, he can induce several thousands of his countrymen to settle in Canada within the next few years.

Home For Defective Children Needed

Supervisor of B.C. Schools Says Number Is Increasing

Vancouver, B.C.—That there is great need for a home for mentally defective children in British Columbia was stated by Miss A. J. Dauphine, supervisor of special classes in the city schools, addressing the health bureau of the Board of Trade. She said the province was estimated to have more than 1,600 mentally defective children and the proportion was rapidly increasing, because of the relatively large birth rate among people of low mentalities, and the lowered rate of infant mortality through the night, when defective babies now as compared with other times.

Byelections In Quebec

Three Liberals and Two Conservatives Are Elected

Montreal.—Winners of the five by-elections in the province of Quebec to fill vacancies in the legislatures were: St. Anne, Montreal.—J. H. Dillon, Liberal, or government. No change. St. Maurice.—A. E. Guillemette, Liberal. No change. Sherbrooke.—A. Crepeau, Conservative. No change. Bonaventure.—P. E. Cote, Liberal. No change.

Quebec County.—L. Bastien, Conservative. Opposition gain. The standing of the parties in the Quebec Legislature as a result of the by-elections is: Total seats, 86; Liberals, 62; Conservatives, 22; vacant 1.

Fiery Cross in the East

St. Catharines.—The first fiery cross, the symbol of the Ku Klux Klan, was burned in this district on Sunday night, when residents of Jordan were startled to see the flaming emblem burning brightly on the mountain. The spectacle attracted a large crowd and could be witnessed for miles around. Smith had previously been burned at Smithville, and on the Hamilton Mountain.

Canadian Minister to Washington

Ottawa, Ont.—One development likely to occur soon is the decision on the appointment of a Canadian minister to Washington. This has been purposely deferred until the elections were held. The situation is that Senator Belmont has the refusal of the appointment, but before accepting would desire certain conditions to be adjusted to his satisfaction.

Depend On Western Market

St. Catharines.—Approximately 800 carloads was the total amount of grapes this season handled by the Niagara District Grape Growers, Limited. In a season of rather unsatisfactory conditions there was one bright feature, the Western Canada trade. The high prices paid for wheat undoubtedly saved the situation for the Niagara grape men this year.

B.C. Counsel Will Attend Hearing

Victoria.—British Columbia counsel will attend the privy council hearing of the prairie provinces appeal against the decision of the railway board abolishing the Crow's Nest rate agreement, Premier Oliver announced. The province also will be represented when the prairies ask the Supreme Court of Canada to rule on certain legal aspects of the board's decision.

WESTERN EDITORS

C. L. WILLIS, Editor and Proprietor of The Independent, Stettler, Alberta.

No Adjustment Of Tariff Likely

Canadian Producers Still Barred From U.S. Markets

Ottawa, Ont.—That the result of the United States election eliminates any hope of Canadian products securing more favorable conditions of entry into the United States market is the most commonly drawn here. The lessening of the presidential election that Republican party being the party of high protection, their sweep of the country consequently holds out little hope of tariff adjustments in a downward direction. They enacted the Fordney tariff and supplementary legislation which places a duty that is largely prohibitive on Canadian grain, cattle, fish and dairy products.

Sets New World's Record

Ottawa Holstein Wins In Record Of Performance Test

Ottawa.—A world's record for butter production has been made by Aggie Teal, a seven-year-old Holstein, owned by W. R. Cummings, proprietor of the Gold Dollar Stock Farm, about three miles from here, it is announced by Charles Wood, supervisor of the record of performance tests. Mr. Cummings' cow made 1,128 pounds in the 305-day test as compared with the previous Canadian and world record in the 305-day test held by Holstein owned by R. H. Stevens, of Bowmanville, Ont., which made 1,122½ pounds of butter in that time.

WILL CONTINUE FIGHT TO HAVE PACT RESTORED

Winnipeg.—Both Alberta and Saskatchewan will co-operate to the full with Manitoba in doing everything possible for the reinstatement of the Crow's Nest Pass agreement rates, according to statements made here following a meeting of the attorney-generals of the prairie provinces and H. J. Symington, K.C., counsel representing the provinces.

"The prairie provinces will stand shoulder to shoulder in the matter," said Hon. J. E. Brownlee, attorney-general of Alberta, "and not a stone will be left untaken to attain what we all in the west desire."

Hon. J. A. Cross, attorney-general for Saskatchewan, was equally as earnest in stating that Saskatchewan was solid behind the movement.

"While everyone knows that appeals have been made to the governor-in-council, and the Supreme Court against the decision of the railway board, and while the matter is, so to speak, subjudice, I will say right now that Saskatchewan will take second place to none of the prairie provinces in its endeavor to have this wrong righted," said Mr. Cross.

Says Grain Standards Too High

Lethbridge.—There is some grumbling heard over wheat grading. T. O. King, a new member of the Grain Standards Board, declared in an interview with a reporter from Winnipeg, that our standards are too high as compared with those in the U.S., a competitive country. Mr. King holds that parliament should amend the Canada Grain Act at the coming session.

French Government and the Vatican

Paris.—Diplomatic circles apprehend an early crisis in the relations between the French Government and the Vatican, and feel that the final issue has been hastened by the protest made in France last week by Mr. Beneventuro Grotti, papal nuncio in Paris, against the speech by Francois Albert, minister of education, in which the minister criticized the nuncio's address before the Catholic Institute in 1922.

ASK GOVERNMENT TO COME TO AID OF DEPOSITORS

Toronto.—Another attempt is to be made shortly by the committee representing depositors and shareholders in the Home Bank to persuade the government to come to the relief of the depositors to the extent of 60 per cent. of their losses.

W. T. J. Lee, chairman of the depositors' committee, announces that the committee will shortly ask an official interview with the Federal Government to propose that the liquidators take over all the bank's assets and realize on them. Meantime, the government having aided 60 cents on the dollar to the 25 cents already paid depositors, will endeavor to obtain the remaining 15 cents for the depositor, and perhaps a little over the hundred per cent, which would belong to the treasury.

In round figures the government would be asked to put up \$7,000,000 now for the scheme.

Explosion Caused Disaster

Coroner's Jury Render Verdict On Train Outrage

Nelson, B.C.—That the said William J. Armstrong, Mary Streloff, Harry J. Bishop and Nell E. Murray came to their deaths as the result of a powerful explosion near Farron, B.C., on the morning of October 29, placed in C.P.R. car No. 1536 by some person or persons unknown, either with intent or through ignorance. Such was the verdict arrived at by the coroner's jury sitting here. "Further," said the verdict, "we earnestly request that the attorney-general's department of the province continue diligently to secure evidence to apprehend the person or persons responsible for this terrible accident."

Home Bank Collections

Many Executions Issued In Western Provinces Against Shareholders

Toronto.—So far \$50,000 has been paid by Home Bank shareholders on account of double liability. Seventy-five executions have been issued in Saskatchewan and 50 in Toronto. The rest of Ontario will be covered this week. Two hundred will go to Manitoba and a dozen in British Columbia.

Choosing Doukhobor Head

Nelson, B.C.—The Doukhobors at meetings at Brilliant, decided to postpone for six weeks the choice of a new spiritual head for their sect, and of a new president for the Christian Community of Universal Brotherhood, to succeed the late Peter Veregin. M. J. Czaroff, vice-president of the community, is automatically in charge of the organization's affairs until a new president is elected.

Want Singapore Base

Wellington, N.Z.—The New Zealand Government will lose neither opportunity nor time in impressing on the British Government the value to New Zealand and Australia of a naval base at Singapore, so Premier W. F. Massey informed the New Zealand Parliament.

The Family Medicine Chest.

The best remedy for pains, sores, cuts, bruises, sprains.

WRIGLEYS

After every meal

A pleasant and agreeable way to get the best of last-day benefit as well as good for teeth, breath and digestion. Makes the next cigar taste better.

Serious Conditions In Russia

With Winter Comes Famine Conditions
Which Confronts the Soviet

Only a few months ago the Soviet press discussed projects aimed at increasing the export of grain from Russia and at conquering European markets. But soon afterwards there appeared in the Moscow daily telegrams on the failure of crops in various parts of the country, while a month or two later, towards the end of July, it was stated that at least six to seven million people would be menaced with starvation in the course of the winter to come.

"Ekonicheskaya Zhizn," the official economic organ of the Soviets, defines as follows the scope of the approaching crisis: "In 1921, when a disastrous famine ravaged Russia's southeastern provinces, the whole country produced only one-half of the grain also used to produce before the war. This year production has been equal to two-thirds of the pre-war figure. Hence the number of famine-sufferers will be insignificant as compared with 1921, when up to thirty millions were affected by the unprecedented calamity. The Soviet Government will be able to save the famine-sufferers from starvation by its own efforts and out of its own resources."

This is, however, the official version, which can hardly be reconciled with what one reads between the lines of reports printed in the "Izvestia" and "Pravda." For instance, the mere enumeration of regions that have suffered from the drought makes it clear that the famine-stricken area will be wider this year than it was in 1921. It is not only Volga provinces and the Ukraine that are now menaced with starvation; in these enormous regions must be added also important parts of Central Russia which did not suffer three years ago and will now experience the famine for the first time.

Whatever be the precise proportions of the disaster, it is clear that any government confronted with it should take a series of measures directed to counteract its eventual consequences. It is evident that the exportation of grain from the country should be prohibited, and that all philanthropic organizations should be urged to combine their efforts in combating the calamity. Such would be undoubtedly the attitude of any other government, but the Soviet Government has its own way of looking at things—New York Outlook.

Montreal's Supremacy

Greatest Grain Handling Port On the Atlantic Seaboard

Montreal supremacy as the greatest grain handling port on the Atlantic coast of North America is further strengthened by the showing made by this port during the period beginning January 1 and ending September 30. During that time the port of Montreal handled 99,025,782 bushels of grain, as compared with 28,281,096 bushels in New York and 10,262,056 bushels in Calcutta.

By delivering 1,728,674 bushels of grain to ocean vessels for export in the space of a single working day the port of Montreal has created a new record. The amount of the day's deliveries was more than half a million bushels over the daily figure required to bring the total exports for the season to 17,000,000 bushels, the amount forecast for the season recently by the president of the harbor board.

New Way To Plant Trees

German Claim Method Saves Six Years of Growth

A method of tree planting which is claimed to save six years growth has been developed by the department of forestry, Munich. The roots of the baby trees are spread in the way nature intended, instead of up and down as is usually done. German foresters also say that packing the earth about young trees is wrong as it robs the roots of breathing space.

German Build Planes

Germany plans to build the world, in the construction of giant aircraft, built throughout of light-weight metal alloys, for long flights on globe-circling routes. Government authorities also plan to reinforce the military air service by a great civilian reserve of men skilled in aeronautical work. The government is fostering every form of aeroplaning aviation.

Preaches Modernism

"Chemistry has put an end to the belief in a resurrection of this present flesh of ours," Canon Barnes, the bishop-designate of Birmingham, England, told a congregation. "It is the spirit which would have immortality," he said. The sermon resulted in considerable discussion in London theological circles.

Not one man in 200 is over six feet in height.

W. N. U. 1550

Have Not Determined Duke's Inheritance

Trustees Believe Boy Duke of Norfolk

Seven years after his father's death, the 17-year-old Duke of Norfolk still does not know what his inheritance is worth. If some estimates are to be believed, only \$15,000,000 stands between the duke and the pot of gold; but more encouraging reports put his total capital at \$85,000,000.

The late duke owned 50,000 acres of land in London and elsewhere, and all this is being held in trust for the present duke. He owns several entire streets in London and some miles of sea front in Sussex.

Ever since the death of the old duke, experts have been at work trying to find out what his property was worth. They have just given up the task and turned it over to the public trustee, who hopes to settle up the estate within two years.

Saskatchewan Schools Crowded

Students Applying For Admission From Outside of Province Have

Manitoba students applying for admission to Saskatchewan normal schools have had to be refused owing to the large number of resident students sending in applications.

The current sessions at the Saskatchewan normal schools are crowded, and the prospect is that the local sessions opening in various parts of the province will also be largely attended.

The only outside students being admitted to the normal schools are graduates in arts and teachers holding third-class certificates and grade XII credits for admission to the 18 weeks' session opening in January. The teachers to train for first-class teachers' certificates.

Origin Of Word Forgotten

Why Term "Plucked" Is Applied To Unsuccessful Student

A person who fails to pass an examination is said to have been "plucked." This meaning of the word has a curious origin. In olden days when degrees were conferred in Oxford, two professors marched solemnly down the hall and back. Trademen with grievances—namely, unpaid bills—would call on the benches and pluck the professor's gown as he passed. If the bill was big enough and the tradesman proved his case, the undergraduate was refused his degree. Hence the term "plucked," which, now that its origin is forgotten, is used for failing in examinations of any kind. The professors still march up and down the hall, but of course, their gowns are no longer plucked.

Russian Prince To Operate Ranch

Reported That Prince Olinovsky Will Locate Sheep Ranch In Southern Alberta

It is reported at Calgary that Southern Alberta is to have another great ranch in the person of Prince Olinovsky, of the deposed family of Russia, who is said to be making extensive arrangements to secure a large sheep ranch in this part of the province. The Prince is a personal friend of the Prince of Wales and, like the owner of the E. P. Ranch, has become enamored of the Alberta range country.

Salmon Plentiful

British Columbia canners will have a bumper crop of canned salmon this year. Already 1,350,000 cases have been packed, and a low estimate puts the aggregate returns from the canneries this year at 1,500,000 cases. Large shipments of the new pack continue to move out on every steamer for England.

Men Wear Women's Hats

As a protest against the increasing popularity of mannish styles among women, a club of young business men of Vienna have agreed to wear women's hats on the streets for a period of six months. This is expected to shame the women who have strayed away from feminine modes of dress.

Cottages For Hebrideans

Contract for the construction of fifty cottages, which are to be occupied by the new parties of Hebrideans arriving in Central Alberta, has been awarded to the Pool Construction Company, of Regina and Edmonton. The contract has been awarded by the Edmonton representative of the Scottish Aid Society.

Metal Frocks

Metal coats and frocks woven with fine threads of gold and silver are among the novelties of the winter season in London. To highlight their effect of gleaming splendor, the gowns are treated by a new frosting process.

Twenty miles of thread were used in the making of a coat shown at the recent fur exhibition in London.

Fattening Yearling Steers

Experiments Made at Scott Experimental Station With Sunflower Silage

In both of the two years that an experiment has been tried at the Scott, Sask., Dominion experimental station in silage versus no silage for fattening yearling steers, those silage-fed were more uniformly finished than those receiving straw and grain only. In the latter group some of the steers were quite fat while a number of others were not so well finished. Both lots received the same grain ration and all the straw they would consume. One lot received all the sunflower silage the cattle would devour and it was this lot that showed the most uniform finish. The other lot received no succulent feed.

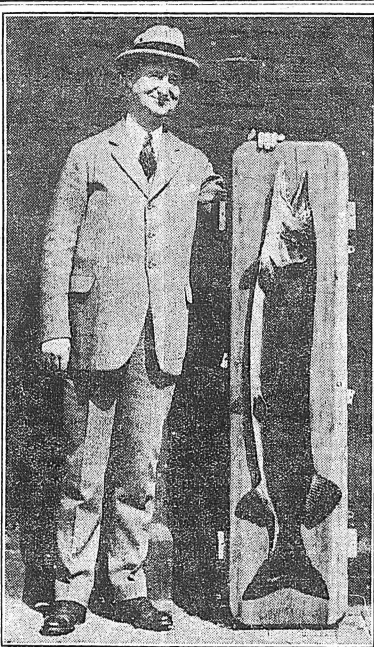

In an experiment conducted simultaneously to ascertain the quantity of silage it was desirable should be set out for fattening steers, a light ration of silage was compared with feeding all the silage the animals would consume, another object being to determine whether the silage only furnished a succulent feed that acted as a conditioner or whether it actually provided valuable nutrients that would eventually replace the straw. The silage had been made from immature sunflowers, one lot of steers receiving 20 pounds per animal per day and the other twenty pounds. It was found that the steers receiving the heavier silage ration increased \$2.54 more in value than those receiving the lighter ration. Those receiving the least silage consumed the most straw, 52 pounds more grain to make 100 pounds of gain, and showed \$2.49 more profit per steer. The average cost of feeding steers valuing silage at \$5 per ton, heaviest silage ration, \$37.20; light ration silage, \$42.23. The results show that the steers fed the lighter ration made a profit of \$18.20 per head, while the profit from those receiving the heavier ration was \$15.59.

Deepest Place In Pacific

Sounded 32,000 Feet and Bottom Was Not Reached

The deepest place yet located in any ocean has just been sounded in the Pacific, 50 miles off the Japanese coast. It was announced by the Geodetic Survey that a Japanese man of war, the Manchu, made the soundings to a depth of 32,614 feet or more than 6 1/2 miles without touching bottom. How much deeper the ocean bed lies there could not be determined because the sounding wire carried by the ship was not long enough. The greatest depth previously recorded was off the coast of Mindanao, Philippine Islands, where bottom was reached at 22,113 feet.

Guest: Do you remember me?
Tommy: Oh, yes. You gave me a dime last time you came here and took it back after I forgot it and left it on the table.

Naturally Proud Of His First Musky

Samuel W. Franklin, of New York, is the smiling figure in the photograph. The trophy he displays is the first muskies he ever caught. He left the French River Bungalow Camp with Joe Ladozeur, one of the best guides in that territory, and the strike was made on Two Mile Bay. As Mr. Franklin had but a very light line and tackle, it took him over an hour and a half to land the musky which weighed the scales at 38 1/2 pounds.

Can Decay In Wood Be Prevented?

Valuable Knowledge Is Secured As A Result Of Investigation

Some of the oldest buildings in Canada now standing were built of wood. Flour and grist mills of wood construction that have served generation after generation are still turning out their product and will no doubt do so for many years yet. This is, however, not always the case. Wood, unfortunately, like practically everything else has its enemies, and probably the most destructive of these are fungi. To secure exact information as to the conditions which facilitate the action of various wood-destroying fungi on woods used for interior construction in mills, factories, etc., and to work out procedures and methods by means of which the decay may be prevented, the Forest Products Laboratories of the Department of the Interior have been carrying on investigations for some years. Expert technical knowledge on the prevention of decay has been secured as a result of decay studies in some hundreds of large buildings.

What is almost of equal importance to Canadian industry is the series of mechanical and physical tests which the laboratories are conducting on the strength of Canadian timbers. Data has now been obtained for practically all Canadian timbers of any commercial value, and these are available to architects, engineers, builders and others interested in construction work.

Knows Customers By Their Feet

London Shoemaker Never Has To Ask For Names

There is a shoemaker in Shoe Street, London, Eng., with a large and fashionable trade who is never under the awkward necessity of asking a customer's name—why not customer likes. He knows them by their feet. A glance is quite sufficient to send this true craftsman down to his basement able to put his hand upon the lasts from which the shoes being worn in the shop above were made. And on the last he finds the customer's name! So this shoemaker, who with trained craft and the time-honored tools makes better "footwear" than machinery produces, literally "judges not man by the shoe."

Poultry Note

Latest Moulting Hens Are Generally the Best Layers

To determine which hens should be killed off and which kept over for another year, the poultry division of the central experimental farm at Ottawa carried out an experiment, in which it was learned that the latest moulting hens are as a rule the heaviest layers. It is recommended, therefore, that when killing in the late fall, it is well to reserve those that are not fully feathered, that is to say, those that are in the process of moulting, provided they are vigorous and of good type.

Saccharine is the sweetest substance known.

Carbon Monoxide Poisoning In Small Garages

Danger of Exhaust From Engine in Small, Closed Space

The newspapers recently carried a news item of the death from carbon monoxide poisoning, of a prominent Baltimore man, who was found dead in his garage with the engine of his automobile still running. With the onset of colder weather such accidents will probably increase in frequency, says the surgeon-general of the United States Public Health Service, who warns automobile owners of the danger involved in running a gasoline engine in a small closed space for any considerable period of time.

In tests of the exhaust of a small 20-horsepower automobile engine, it has been found that it discharged approximately 25 cubic feet of gas per minute, samples of which gave an average of 6 per cent. carbon monoxide, or 1.5 cubic feet of deadly carbon monoxide gas per minute. Of course larger engines will give off more. Now a ratio of 15 parts carbon monoxide to 10,000 parts of air is considered a dangerous concentration to be exposed to for a considerable time; and the small 20-horsepower engine in "warning up" and giving off only one cubic foot of carbon monoxide per minute would contaminate the air of a small, closed garage, 10 by 10 by 20 feet, to the danger point in about three minutes.

Toured World On Small Sum

Young Englishman Has Just Completed Trip On \$250

A statement in the London Evening Standard to the effect that, by travelling afoot, it is possible for anyone to go round the world for \$150, has called forth a criticism from John Henderson, who has just completed a round-the-world tour on \$250. He suggests that a young man who spend \$150 on clothing, the globe is not only wasting \$100 of good money, but is also missing all chance of seeing the world from a correct perspective.

"It took me a year to get round on my \$50, and it was a wonderful experience. I am glad I accomplished it."

Must Pass Rigid Test

Not An Easy Thing To Get License In France To Drive Car

Before an owner of an automobile in France can obtain a license to drive a car he must first pass a driving test. Sometimes the tests are extremely simple while with another applicant the test may be more severe. If the new driver satisfies his examiner, he is given a temporary license, which is valid permanent a month afterward. The final license is issued to its recipient for life. No renewals are necessary at any time, but on the back of the license it is clearly stated that the police authorities have the right to withdraw it at any time for an infringement of the law.

Canadian Trees Go To England

Lady Byng Secures Some Apple Trees In B.C.

It would appear to be sending coals to Newcastle, but the first shipment of the fall season from the British Columbia nurseries at Sardis, B.C., was 1,000 new bushes for Portland, Ore. Another order recently placed at the same nurseries was from Lady Byng, for shipment to England, of apple trees. On a recent visit to British Columbia Lady Byng was much interested in the quality and varieties of apples grown there that were not grown in England, and showed her desire to try out B.C. trees in her home across the seas by placing this order.

Manitoba's Butter Output

Million and a Half Pounds More Than Last Year

Manitoba's output of butter this year will be a million and a half pounds more than that of last year, according to L. A. Gibson, Provincial Dairy Commissioner. The manufacture of butter in Manitoba is not only increasing but the quality is improving. Daring his estimate on the benefits of the grading system established, Mr. Gibson forecasts the production as likely to reach 12,350,000 pounds this year, and possibly 13,500,000 pounds which will leave 7,000,000 for export.

German Invents Diving Suit

Wearing a new diving suit invented at Kiel, Germany, one may walk the ocean floor at the record depth of 520 feet. The construction is especially massive to withstand the pressure.

A woman never knows what a man thinks of her, although she thinks she does.

"No Provision"

By Marjorie Bradford, Social Services Council of Canada

"Cannot the police advise me what to do with this man?"

The judge turned appealingly to the members of the law, but they could not, because there was no provision for such cases.

The scene was a courtroom, no doubt a crowded one, in a large Canadian city, and the problem which was puzzling the judge was one which is a familiar old bugbear in Canadian courtrooms at the present time. What is to be done with that human devil, the creature "whose future has been wrecked and physical condition shattered by his addition to the use of drugs?"

One more devil had been tossed upon the rocks and the officers of justice could do nothing to save him because "there was no provision for such cases." There he was, emaciated and slinking with weakness, clinging to the edge of the dock. It seems that he had been sentenced some months before to two years in a penitentiary for having been caught with narcotic drugs in his possession. But when found to be intoxicated he was given his liberty. Apparently "there was no provision for such cases."

Now, once more in court, he was pleading that he be sent somewhere, anywhere, for treatment, where some salvage might be made of his ruined life, or where, at least, he might be allowed to live out his remaining days. But he was reluctantly thrown back into the world from which he sought to escape. The officers of justice were powerless to do otherwise—because "there was no provision for such cases."

According to a report recently issued by the federal department of health, a very conservative estimate of the number of drug addicts in Canada is 10,000.

Estimating the cost of the average daily dosage of the consumer, the economic wastage due to the loss in earning power of drug addicts, the cost of 2,500 annual arrests made by police in Canada for offences against the narcotic laws, and the cost of expenses, fees and salaries spent in bringing them to justice, the enormous sum of \$20,575,000 is arrived at as the price paid annually for narcotics in Canada.

"If only a small fraction," the report goes on to say, "of the money thus wasted were spent in the establishment of hospitals or other institutions, colonies or farms for the cure and segregation of drug addicts, it would go a long way towards solving the problem of narcotism in this country, and would prevent, to a very great degree, a lot of misery, suffering and crime, and would be a real 'pay-day society' but to the generations yet unborn."

The problem of the narcotic drug habit in Canada has been traced back at least to the year 1859 when first statistics relating to it were made available. There are now in Canada at least 10,000 bound in squalor and horrible slavery—a small city! And still we have no provision for such cases. One is tempted to exclaim with Saint Joan, "How Long, Oh Lord, How Long!"

Indian Natives' Simple Diet

Fine Race Lives Chiefly on Coarse Bread and Vegetables

An eminent physician who, preoccupied for many years in Simla states that the natives of the Punjab, the northwest province of India, whose diet is mainly coarse wholemeal bread, seldom suffer from cancer. The diet of these people consists of lightly scalded unfermented bread, made from a dough of wholemeal stone-milled unsifted flour into cakes about the size and shape of our pancakes. This bread is eaten with dal, a sort of pulse, or with curried vegetables. A large quantity of cellulose is taken in the form of raw radishes, sugar cane, and raw fruit. The peasants also drink quantities of milk. They thus breed the staff of life. They have magnificent teeth, and are usually of fine physique.

The World Moves Fast

As an illustration of how fast the world is moving, a contemporary reminds us that when Stanley discovered Livingston at Ujiji, the letters handed to him were two years old. A wireless station was recently established at this point on Lake Tanganyika, and a message can now be sent from London in one-fourth of a second.

Hallmarks Severe In India

Hallmarks in India frequently are of such violence as to kill people. There is a case on record occurring in the Moradabad district on May 1, 1888, when about two hundred and fifty persons perished in a severe hallstorm.

When frightened, an ostrich, whose ordinary stride is about 24 inches, takes a stride of 11 feet.

Overseas Postage

Postal Charges On Parcels To Britain Have Been Raised

The postal charges on parcels exchanged between Great Britain and Canada have been raised by the British postal authorities, according to the weekly bulletin issued by the post office from Ottawa under date of October 25.

The information contained in the bulletin is as follows:

"Postmasters are informed that a cable has been received from the British postal authorities advising that it is necessary to raise the postal charges on parcels exchanged with Canada. As a consequence parcel post rates to Great Britain on and after Nov. 1st will be 21¢ for the first pound and 18¢ for each succeeding pound or fraction thereof.

Flowing Language

"How is your son getting on at college?" "He must be doing pretty well in three courses. I have just paid for three courses—\$10 for Latin, \$10 for Greek and \$100 for Scotch."

There is a flat, concrete slab over the unpretentious grave of "Buffalo Bill" only on top of Lookout Mountain in Colorado.

WORLD HAPPENINGS BRIEFLY TOLD

Dr. Micheal Gavrilovich, Jugo Slavian minister to Great Britain, is dead.

Napoleon Lebrun, of Levis, Quebec, was crushed to death when the steam crane of which he was the engineer overturned, pinning him to the ground.

H. S. Allen, of Raymond, and W. G. Smith, of Cardston, have shipped five thousand lambs to Fort William for winter feeding on screenings.

Major Pedro Zanni, the Argentine aviator, has decided to abandon his attempted flight across the Pacific Ocean.

Prominent members of the German colony at Constantinople have purchased the French daily Volante. The newspaper will be printed in the German language.

There are now more tourists crossing from the United States to Canada by automobile than by train, according to officials of the U.S. Customs Department.

Edward Elliot, a cartman of Blyth, drove his cart under a radio aerial, caught his chin under a wire and accidentally cut his throat. It was England's first radio fatality.

During September 109,135,000 pounds of sea fish were landed on the Atlantic and Pacific coasts according to the Department of Marine and Fisheries.

The protocol for the pacific settlement of international disputes drafted by the Assembly of the League of Nations at its last session has been signed by Paraguay. It was announced at league headquarters.

Beginning January 1, calculations as to the weights, measures or values of commodities imported into Rumania must be given in the metric system, according to a government announcement.

Law stamps amounting to eighty cents were attached to the will of Frank Francis whose estate was probated at its last session has been signed by the executor, Mr. Trenchard. The amount of the will was one dollar and the inheritance goes to his widow.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

Coal and Waterpower

Waterpower Development in Canada Results in Saving of Coal

A recent study of the total coal consumption for all purposes in the United States and Canada, taking the average over the past five years, shows that the average coal consumption per capita is 20 per cent. less in Canada than in the United States. Considering that the climate of Canada is colder than the average of the United States the opposite result might be expected and analysis shows that this result is mainly due to the saving of coal in industries by waterpower development. The waterpower development in Canada is now 350 h.p. per 1,000 of population as against 95 h.p. in the United States.

A Good Yield

Red Bobs Wheat Went Forty Bushels Per Acre On Alberta Farms

Nels Lindén, of the Crooked Lake district, near Wetaskiwin, has one of the best crops in the community this year. He threshed a few days ago and had 1,000 bushels of Red Bobs wheat off 25 acres, or an average of 40 bushels to the acre. On another area of eight acres he threshed 420 bushels of Red Bobs, or over 52 bushels to the acre. He also had quite a large field of Marquis which went 40 bushels to the acre. It was all good quality grain, and Mr. Lindén expects to sell it for seed.

Princesses Good Shopkeepers

Také to Work Although Brought Up in Palaces

The business rivalry among foreign Princesses who have shops in London is strong and bitter. Greeks, Russians and Rumanians have a good try for each other's clients, and things wax hot and scathing in consequence. These foreigners make excellent shopkeepers. They are good linguists, splendid designers and most painstaking with their customers. Though brought up in palaces, they have fallen in with their new work as though to the manner born.

Close Mexican Consulates in Britain

The only diplomat to the which bound the British and Mexican Governments was severed with the closing of all the Mexican consulates in Great Britain. This action was the result of Mexico's decision that her representatives could not carry out their duties with self respect after the breakdown of the attempt to re-establish official relations between the two countries.

CUTS BURNS & SCALDS

All Need Zam-Buk

The real danger is that when the scald or outer skin is damaged or removed the sensitive flesh is exposed to the inflammatory action of the air and to the poisonous influence of germs and dirt. The first thing to

AVERT COMPLICATIONS is to cover over with a thin layer of Zam-Buk, which has great antiseptic, purifying and healing powers. Burns and scalds should be treated and bandaged up very quickly. Zam-Buk quickly banishes pain, allays all inflammation and grows new healthy skin. Zam-Buk is so reliable and so useful that it has been only called "A Surgery in a Two-Finch Tin." See box for full details everywhere.

Zam-Buk
ENDS PAIN - GROWS NEW SKIN

Socialist Fallacies

Killing of Individual Incentive and Initiative is Bad For Everyone

The ridiculous notion of reducing everyone to a dull dead level must be abandoned. Allowance must be made for special and superior ability in enterprise, otherwise the incentive which forms the very life-blood of industry would be absent. Workers must admit that the most successful of industrial enterprises, from the point of view of the employees as well as that of the employer are those conducted by men who, in adding to their own wealth, add also to wealth of others. If individual incentive and initiative were discouraged, as would be the case by preventing these qualities from being rewarded, which is in accordance with the doctrines preached by some Labor extremists, the workers themselves would suffer the most. The man who makes a success of business makes a success of it for those he employs as well as for himself.—Adelaide Chronicle.

A GRATEFUL LETTER

From a Lady Made Well by Dr. Williams' Pink Pills

"I wish to hear if I could persuade every person who is run-down in health to give Dr. Williams' Pink Pills a trial. This writes Mrs. Louis Mitchell, Oak Point, Minn., who further says: 'About a year ago I was a weak woman, suffering from a run-down system and impoverished blood. Any little exertion would cause my legs to tremble and my heart to throb violently. I could not sweep a room of walk fifty feet without being exhausted. Then I began taking Dr. Williams' Pink Pills and after taking only six boxes I was well and strong as ever. I can walk and run without stopping every few seconds gasping for breath as previously. Dr. Williams' Pink Pills will be my stand-by in the future if ever my blood needs building up again, and I shall always feel pleasure in recommending them to anyone needing a tonic.'"

There are many troubles due to weak, watery blood which can easily be overcome by a fair use of Dr. Williams' Pink Pills. The sole mission of this medicine is to enrich and purify the blood and thereby banish all of the varied symptoms of anemia disappear, and good health returns. You can get these pills through any dealer in medicine or by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

B.C. Lumber Exports

Lumber exports from Vancouver for the first nine months of 1924 totalled more than 323,000,000 feet, more than 100,000,000 feet in excess of the total for the same period of 1923.

One of the most curious fish found in European waters is the red gurnard, which emits a sound like a crow.

SUNDAY SCHOOL LESSON

NOVEMBER 16

PETER'S CONFESSION

Golden Text: Thou art the Christ, the Son of the living God. Matthew 16:16.

Matthew 16:13, Now when Jesus came into the parts of Caesarea.

The Text Explained and Illumined Views About Jesus, verses 31, 14. Jesus and his disciples had journeyed as far as the neighborhood of Caesarea Philippi when he suddenly asked them, "Who do men say that the Son of Man is?" As recorded by Mark and Luke, the question was, "Who do men say that I am?" It is not thought that the phrase "The Son of man" was associated in the popular mind with the idea of the Messiah. Had it been, Jesus would not have used it as He did early in His ministry. Jesus here used it, seemingly, to keep the question as to who He was undecided. The disciples answered that some thought he was John the Baptist (as Herod said, Mt. 14:2); some, that he was Elijah; and others, Jeremiah or some other of the prophets. Did you ever think of the vast difference there is between the characters of Elijah and Jeremiah?" questions Dr. G. H. Morrison. "The one is ardent, enthusiastic, heroic sometimes. The other is the prophet of the tender heart and tears. And the remarkable thing is that the common people should have taken these types, which are so wide apart, and should have found in both the character of Christ. In other words, the impression which Jesus made was that of a complex, inclusive personality. You could not exhaust him by a single prophet. It took the range of the greatest to portray His character." Dr. Morrison then devotes a chapter of one of his books to pointing out qualities of different nature which harmonized in the human nature of Christ.

Abolish Diseases

Predicted That Time Will Soon Come When All Diseases Will Be Eliminated

The head of a great American chemical manufacturing concern, predicts the end of all disease in fifty years. He included the dread cancer within the scope of his prophecy, which he bases on the progress now being made in chemical science. The prediction does not come within the realm of the impossible. In fact, many unversed in chemistry or medicine have long been confident that mankind would soon conquer the last of its disease enemies. This confidence has been strengthened and rewarded by the progress made in the battle against tuberculosis and the virtual elimination of disease epidemics in Canada and the United States. Chemicals have long been employed effectively in the destruction of the enemies of vegetable life. Why should they not be as effective against the germs which prey upon human life? Already chemistry and surgery have made great headway against disease.—Montreal Herald.

No Complaints

South African Boers Are Satisfied With Protection Given By Britain

(Since the return of Hertzog to power in South Africa there has been no further talk of secession). The Boers are a hard-headed folk, and while some of them at times may become impatient under British domination, they understand that the easy, tolerant hand of Britain in their affairs is much to be preferred to the thing that would happen if that hand, and the protection that goes with it, were to be withdrawn.—Detroit Free Press.

American Suspicion

Philadelphia Ledger, Usually Sensible, Gets a Queer Kink

So long as the league attends to its own business and that of its members, its actions do not concern us. That is the way for it to keep its American friends. It cannot keep them by threatening American rights and sovereignty. Coercion is not the way; yielding to Japan is not the way. The Japanese half-victory at Geneva is significant. One more turn has been given the screws by which Europe is resolved to coerce us into the league.—Philadelphia Ledger.

Exports To France

Canada's exports to France during the years 1922 and 1923 were more than double those of the previous year, according to a government bulletin. The increase was due principally to cereals, dried and tinned fruits, sugar, wood pulp, steam and other engines. French exports to Canada showed only a small increase.

An Unusual Hobby

According to a man who served under him during the war, Lord Thomson, the old minister, now on his way back from Iraq, possesses an unusual hobby. Given the cork of a champagne bottle, he can tell the kind, the quality, the year and, in short, the history of the wine it once held in bounds.

Manitoba Butter

\$759,929 Realized From Sale of Product In Month Of August

Manitoba's output of butter for the month of August realized the sum of \$759,929, according to an announcement of the provincial dairy commissioner. The manufacture during the month totalled 2,309,815 pounds, or 572,298 pounds in excess of the same month in 1923. During August some 593,320 pounds of butter were exported, more than 50 per cent. of which went to the British Isles. It is estimated by the commissioner that from 23,000 to 25,000 farmers contributed to this production.

All Night with Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning finds him wholly unfit for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

The Yellow Sea of China is popularly supposed to be so called because of its mudiness, but scientists have proved that it derives its color from a multitude of minute living organisms.

Teachers' Convention

The joint convention of the Oyen and Hanna Inspectorates held in Hanna November 6-7 was about as happy and beneficial a function as meetings of this kind can be made. The Mayor and Council, the Kiwanis Club, Mr. Laurie, and the people of Hanna generally, did all in their power to show hospitality to the visiting teachers. Inspectors Aylesworth and Haverstock and other members of the Executive left nothing undone to make the convention profitable to the teaching body. The papers, classes and discussions were of decided interest and edification. Dr. McNally's discourses being particularly beneficial. The general consensus of opinion attributed to the convention the heartiest appreciation. A joint convention was decided upon for next year to be held in Hanna again as the most central point.

Remember the fowl supper and entertainment in the Chinook Church next Thursday evening, November 20.

Details of special train service, via Canadian National Railways, to the ship's side, Halifax, for Old Country Christmas sailings, are announced elsewhere in this issue. There will be a big demand for these Christmas sailings and those contemplating a trip to the Old Country should book now with the local agent of the Canadian National Railways, who represents all steamship lines and who will be pleased to make complete arrangements for your trip.
